

Fagan Nomogram

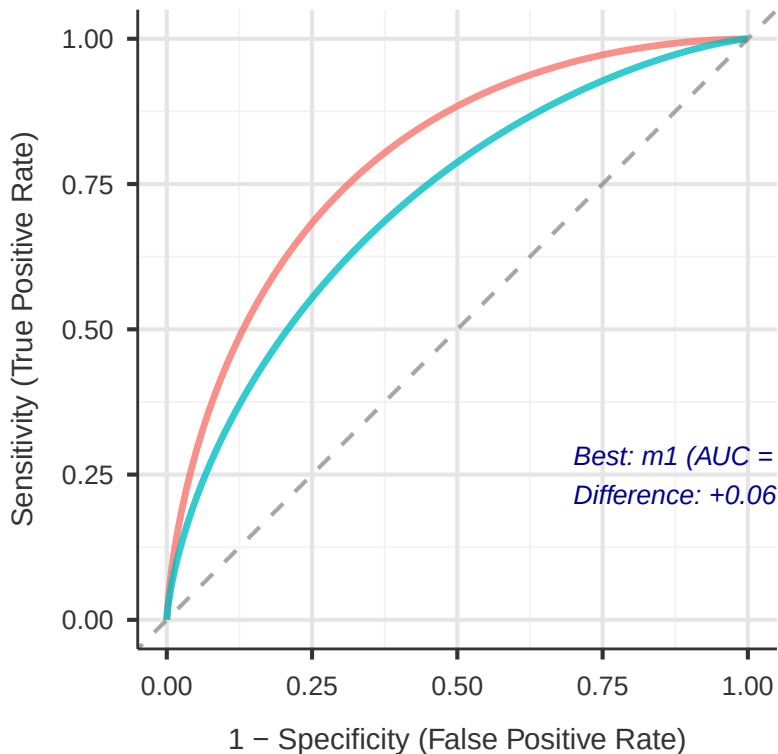

ROC Curve Analysis

Predictor — m1 — m2

Comparative ROC Analysis

ROC curves with AUC values for comparison

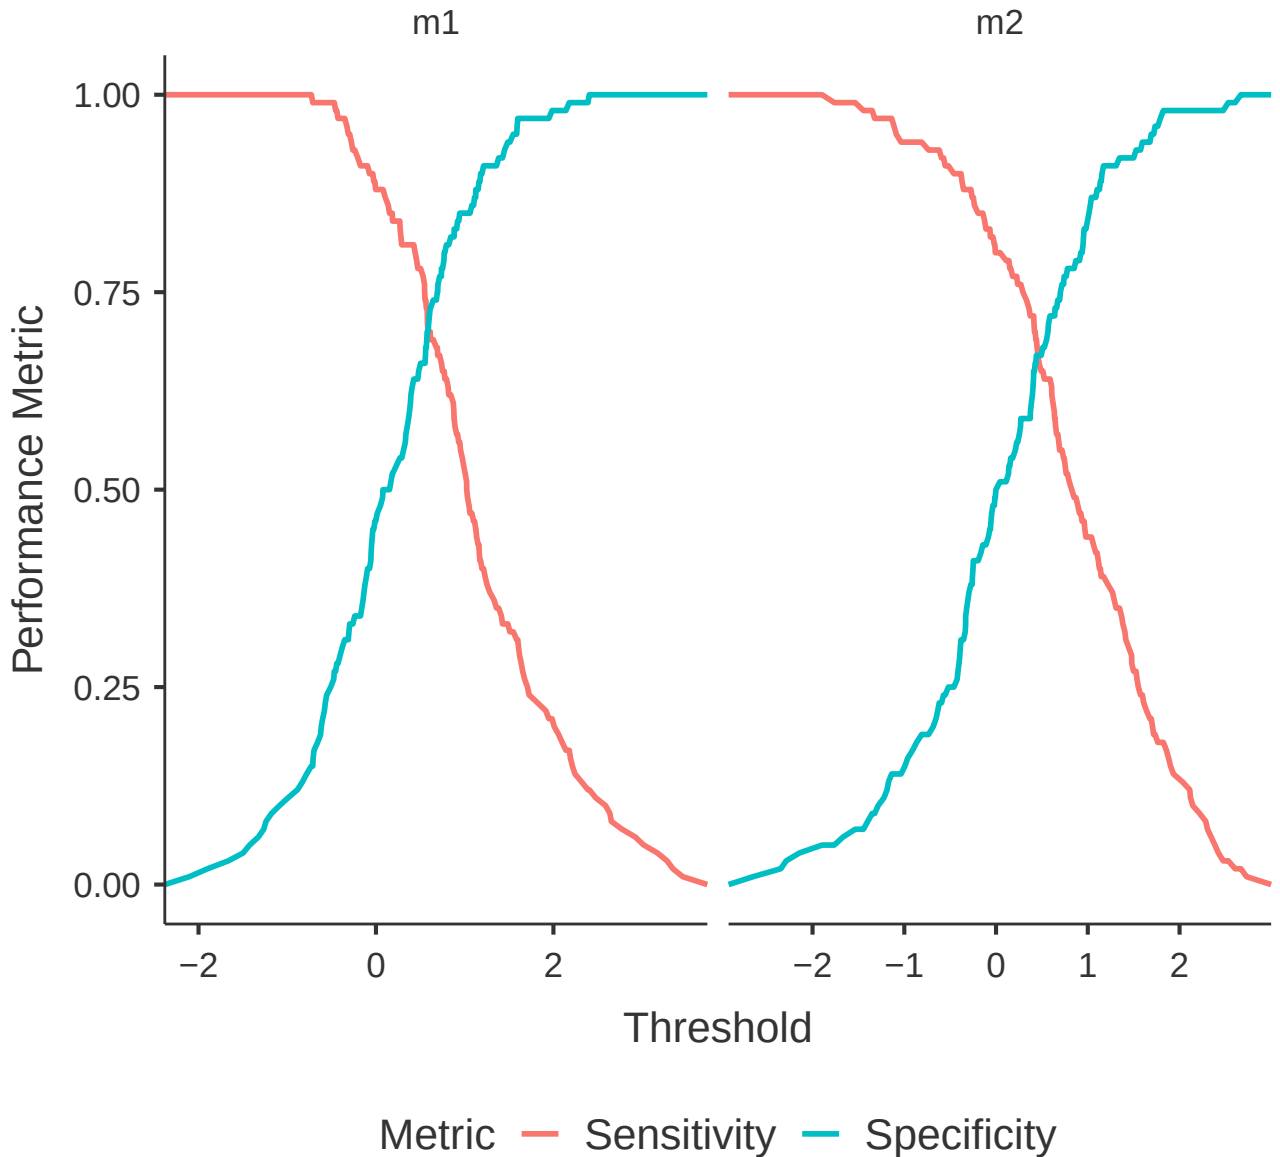

Predictor (AUC)

m1 (AUC = 0.788)

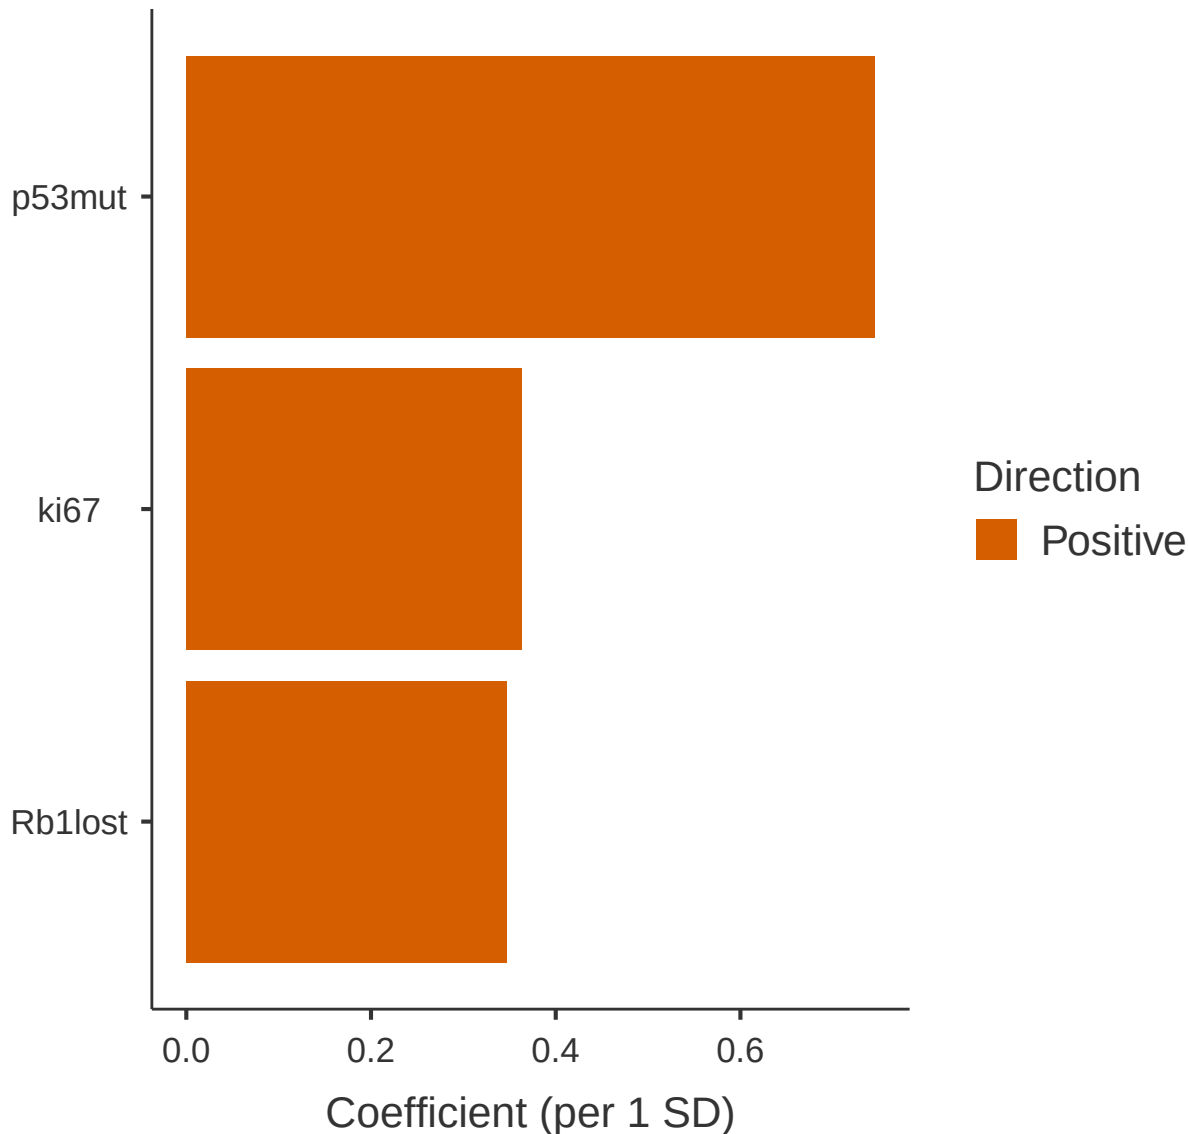

m2 (AUC = 0.722)

Sensitivity and Specificity vs Threshold

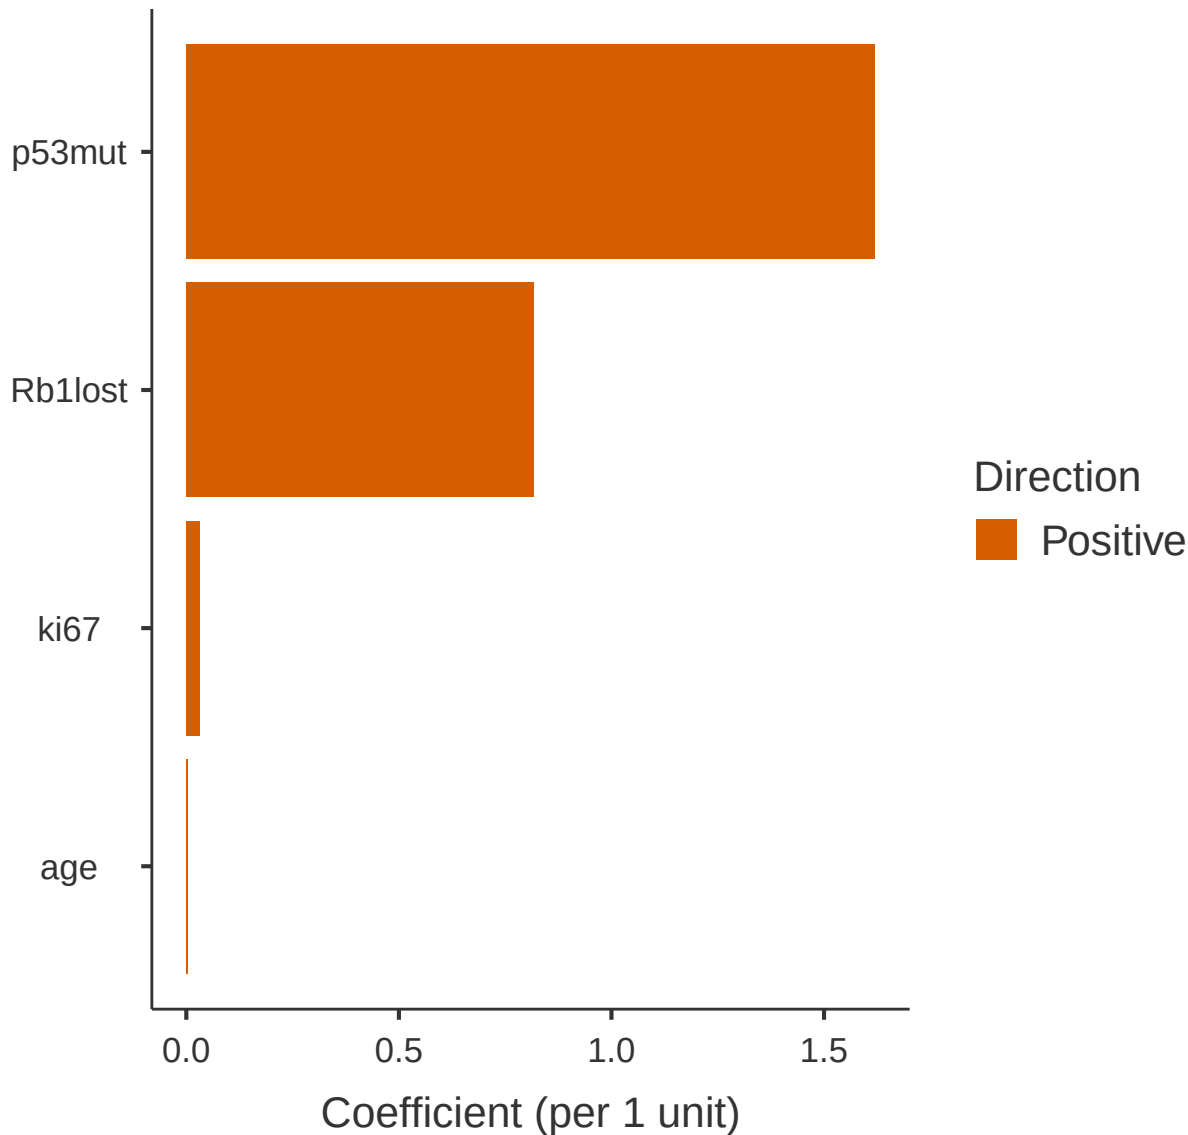

LASSO Logistic Regression Coefficients

Comparable across units; the table reports the original scale

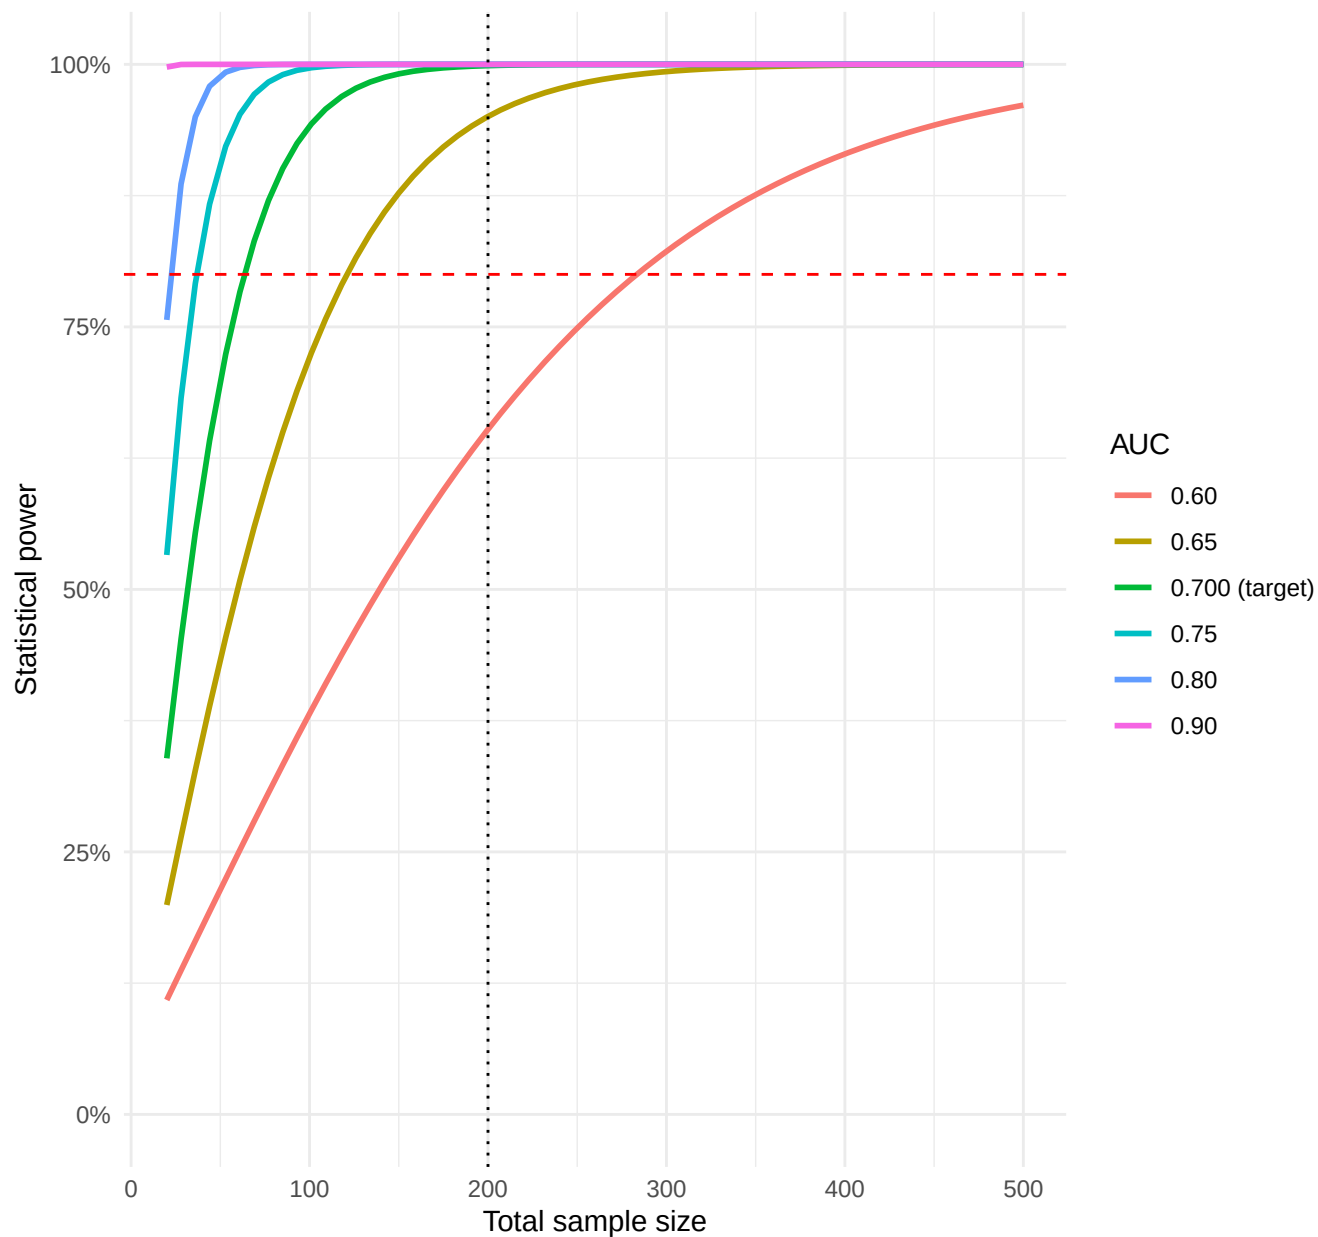

LASSO Logistic Regression Coefficients

Original measurement scale, as in the Selected Variables t

Power to detect AUC above 0.5 (Hanley–McNeil)

alpha = 0.05, positive fraction = 35.5%, dotted line = current n = 200

Decision Curve Analysis
