Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

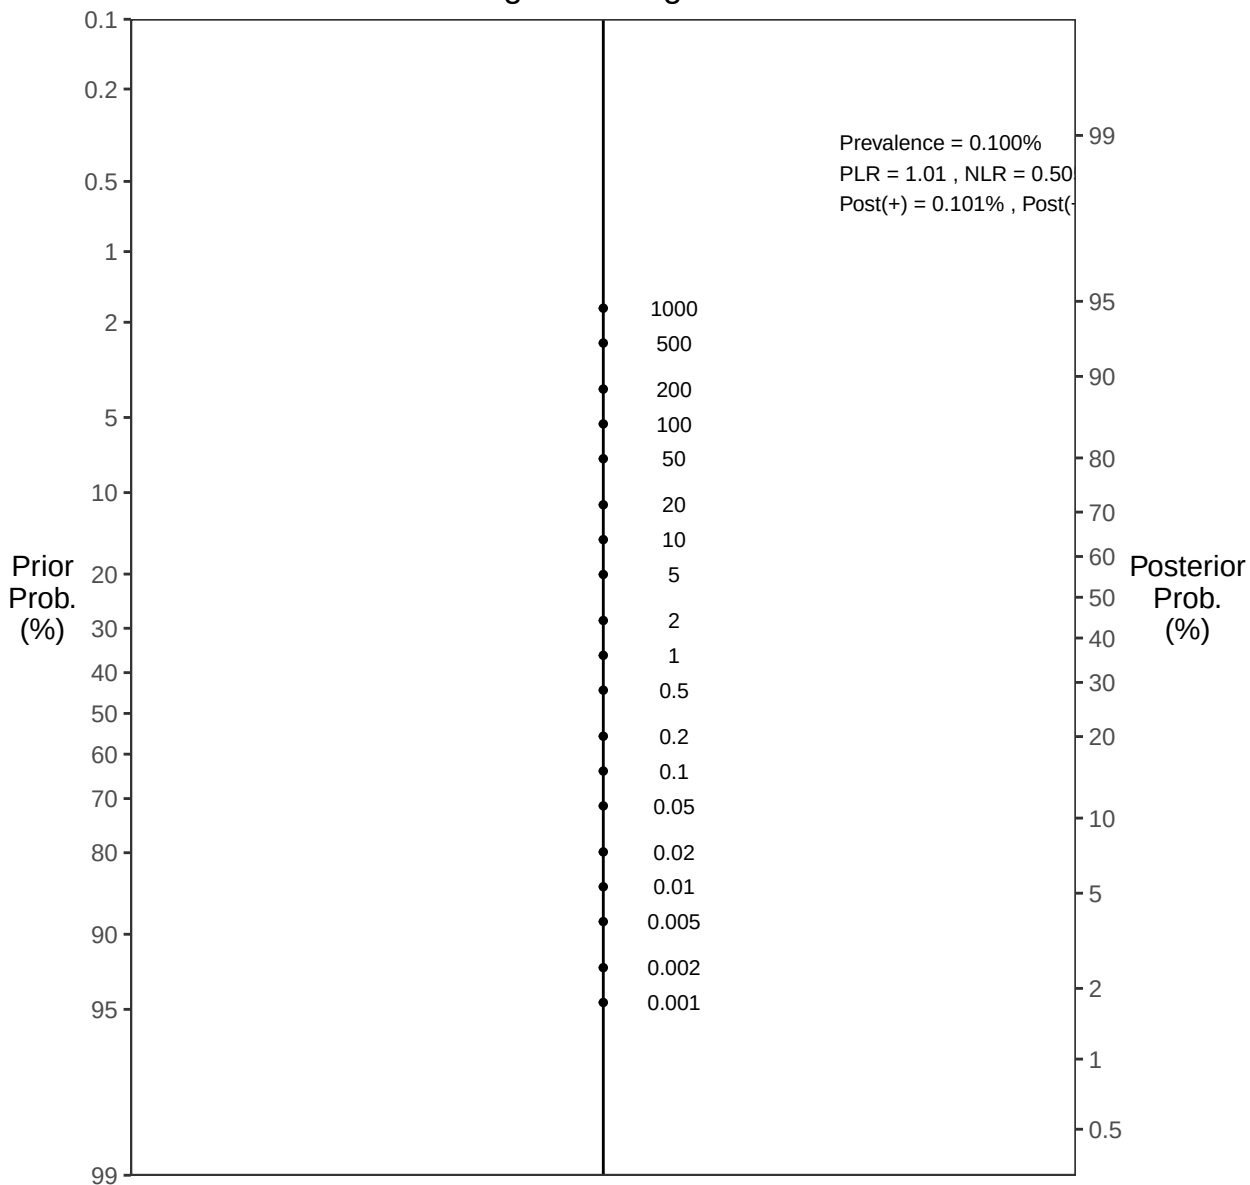

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

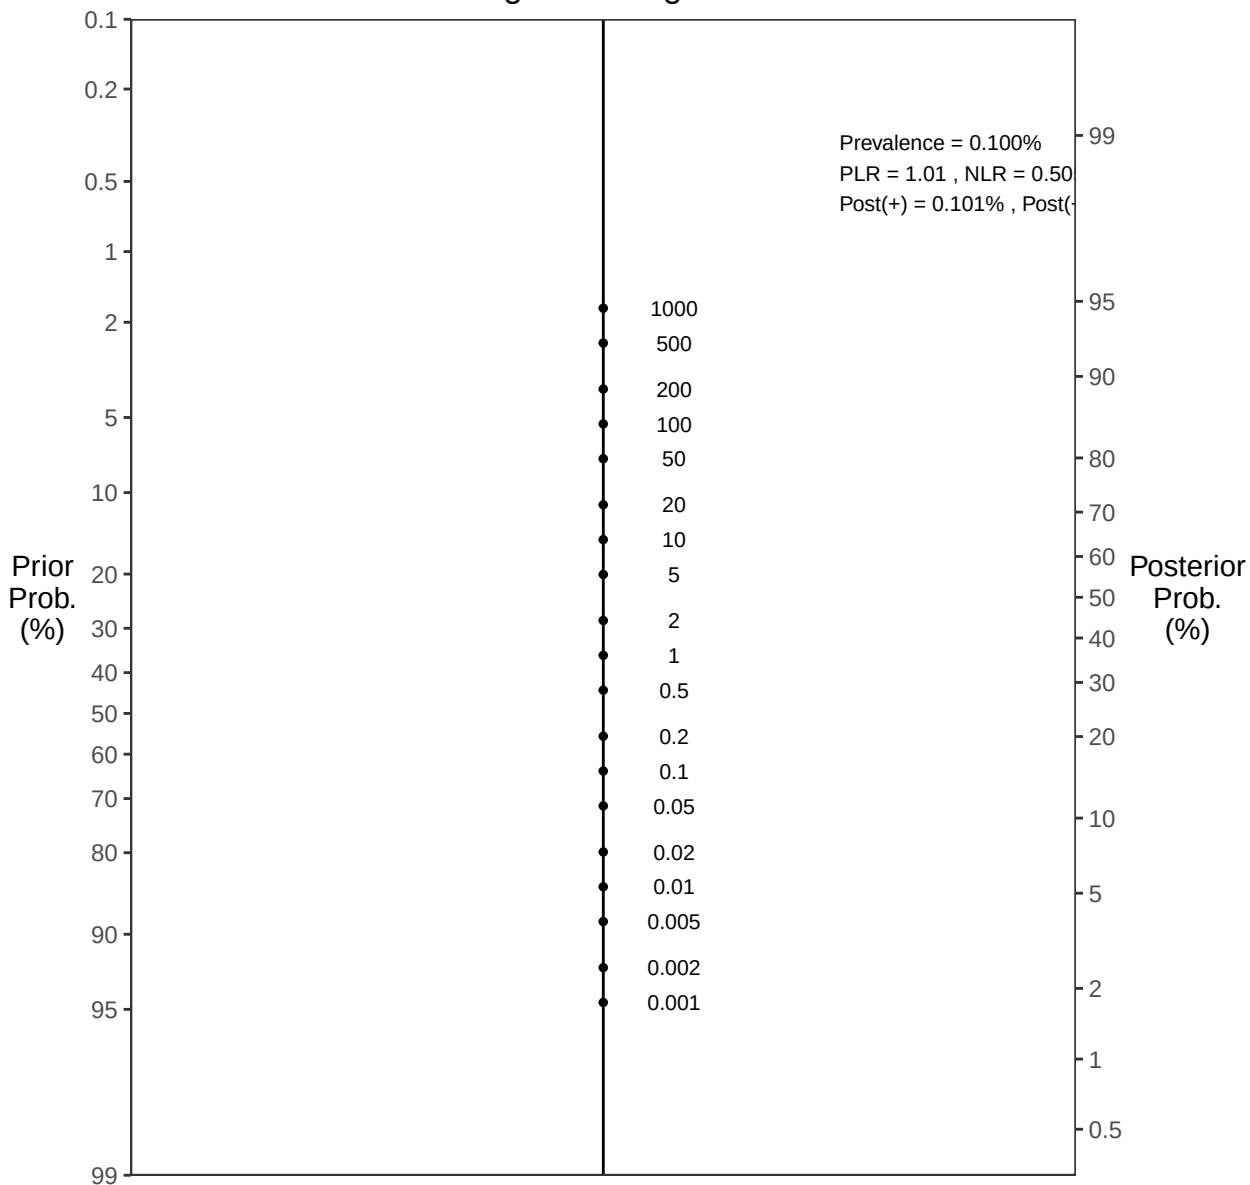

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

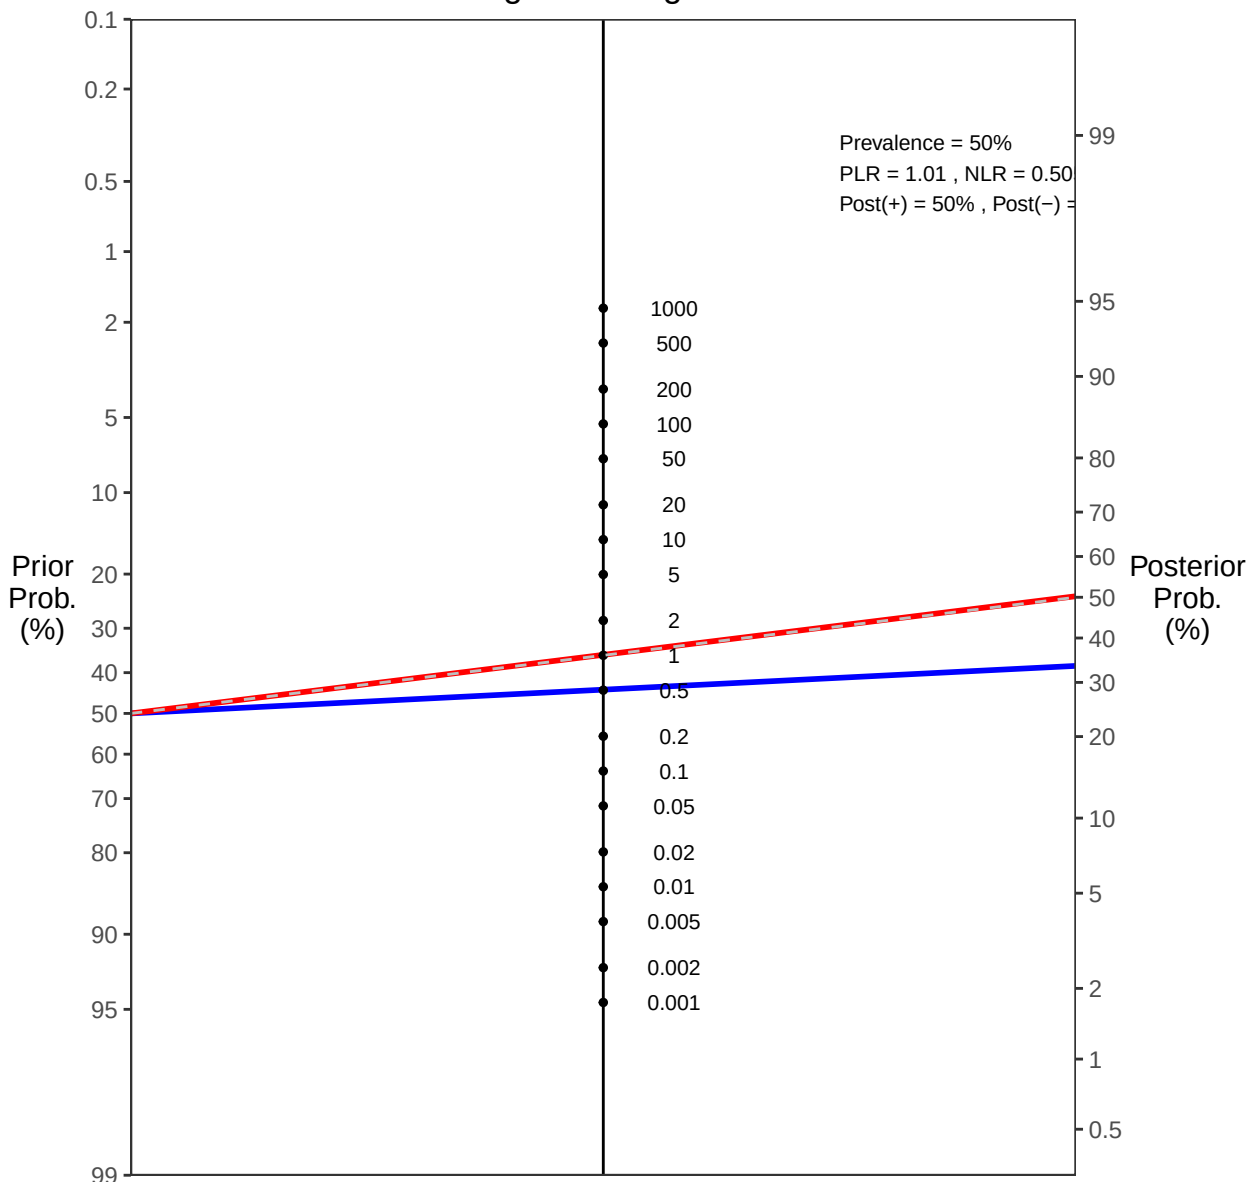

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

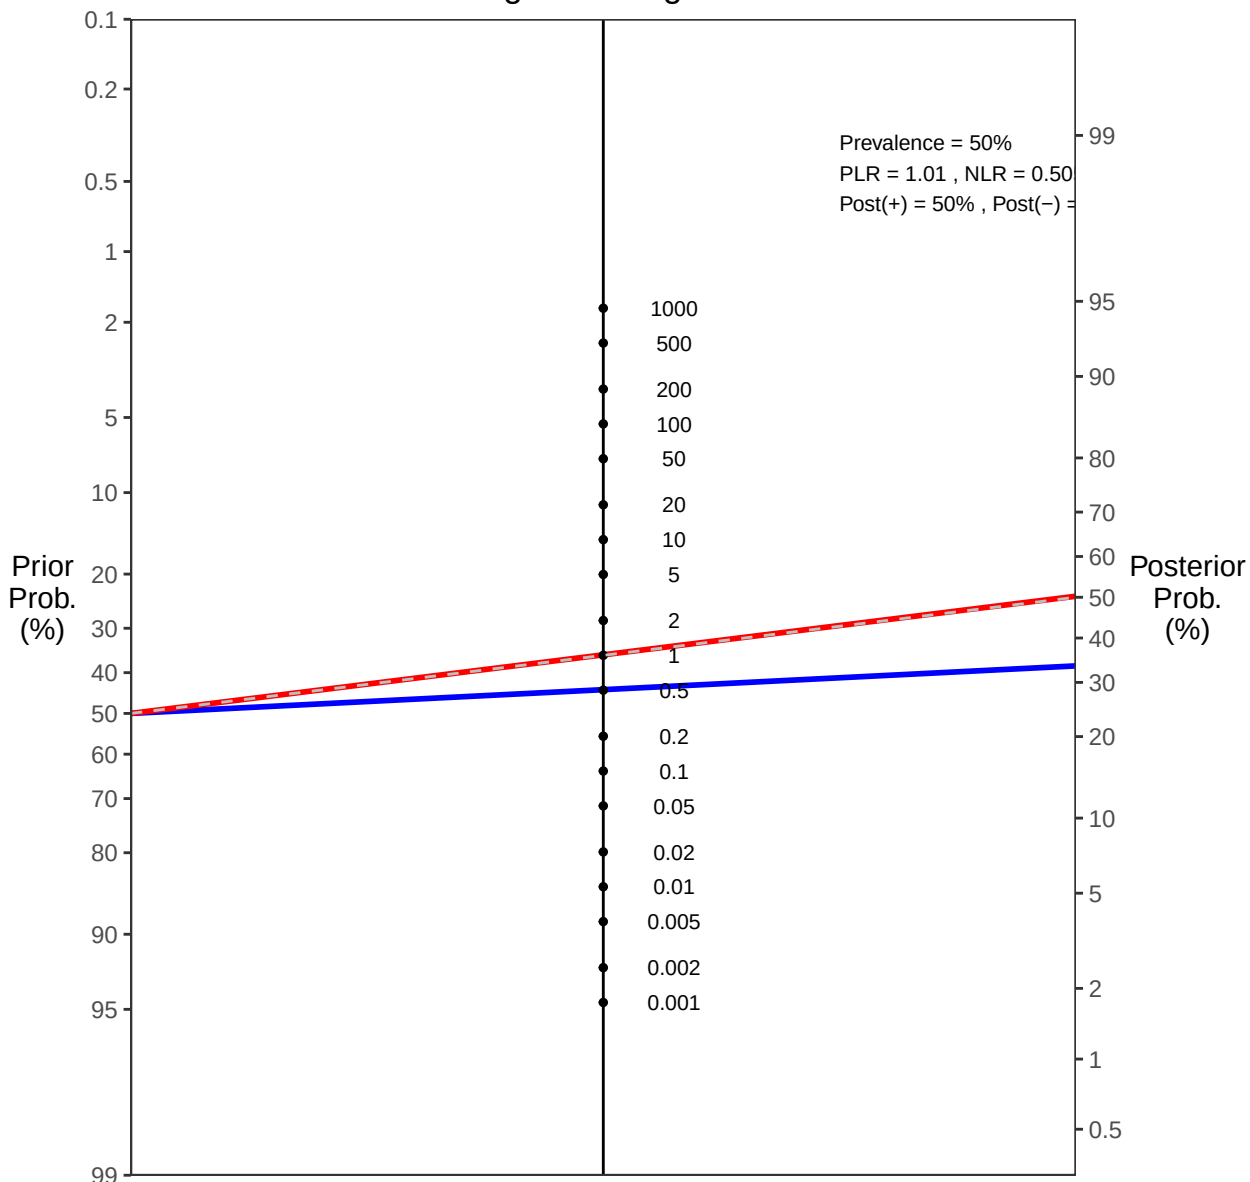

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

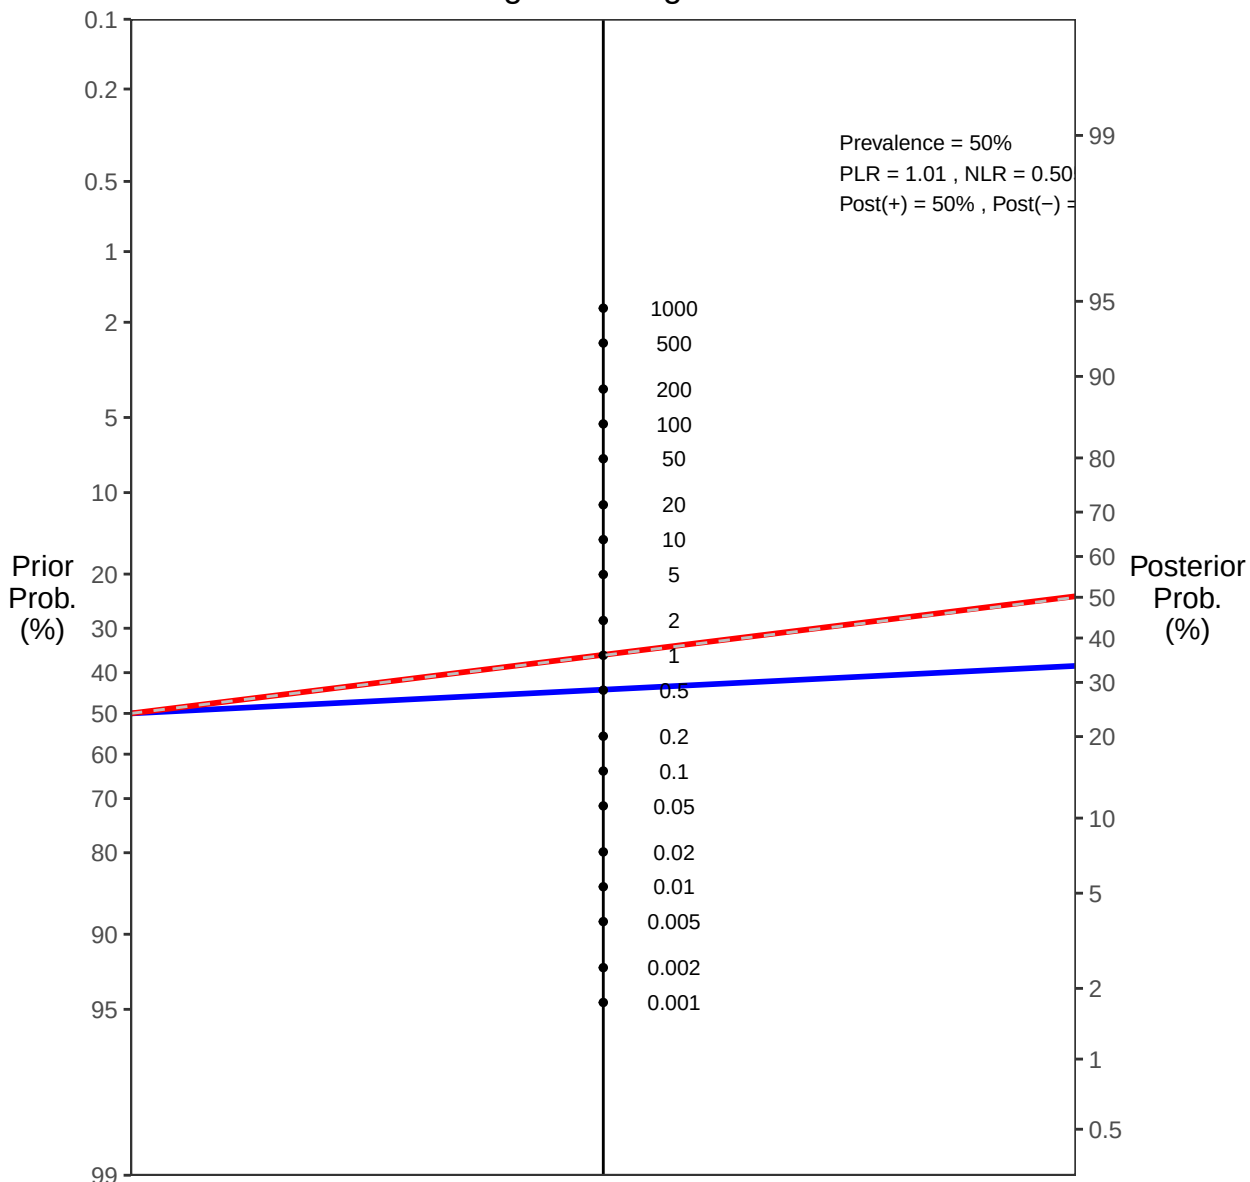

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

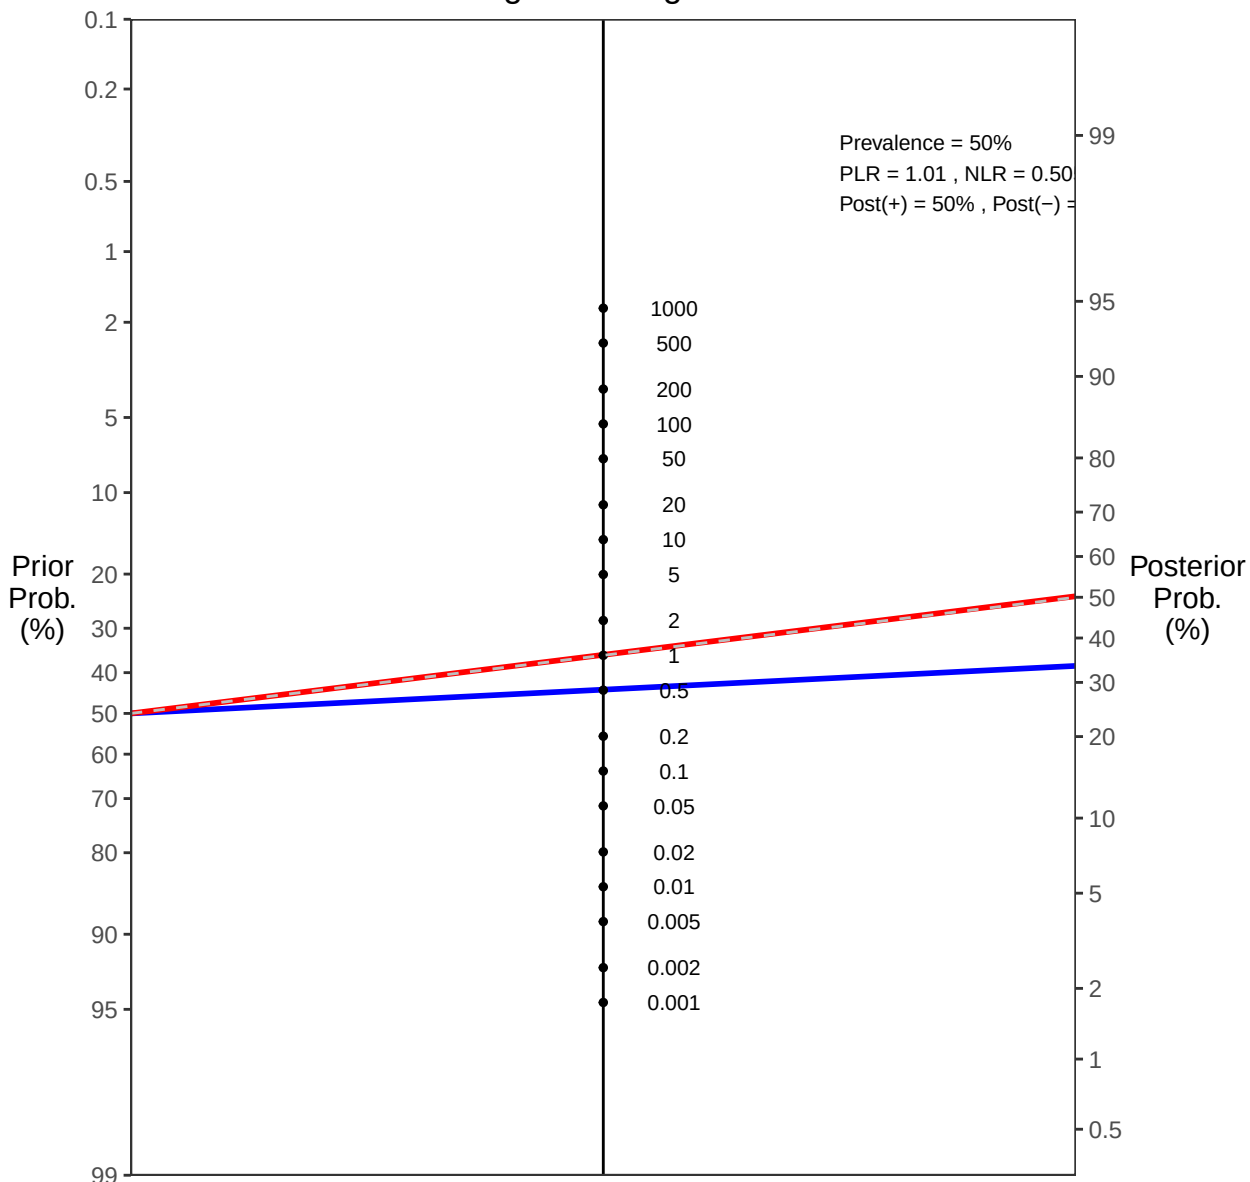

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

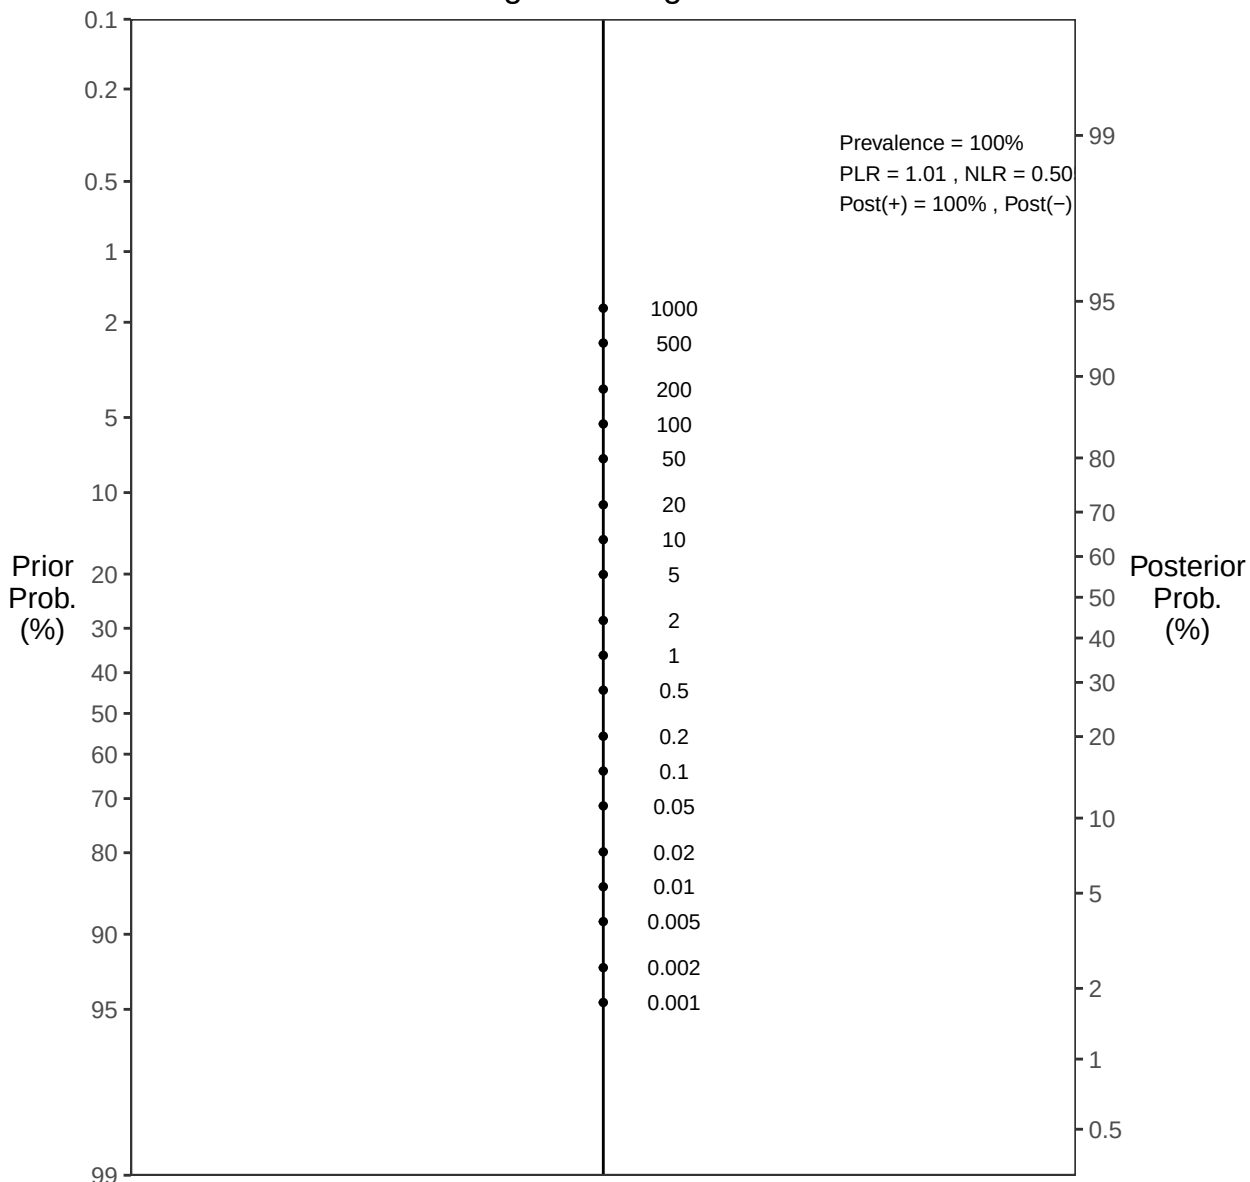

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

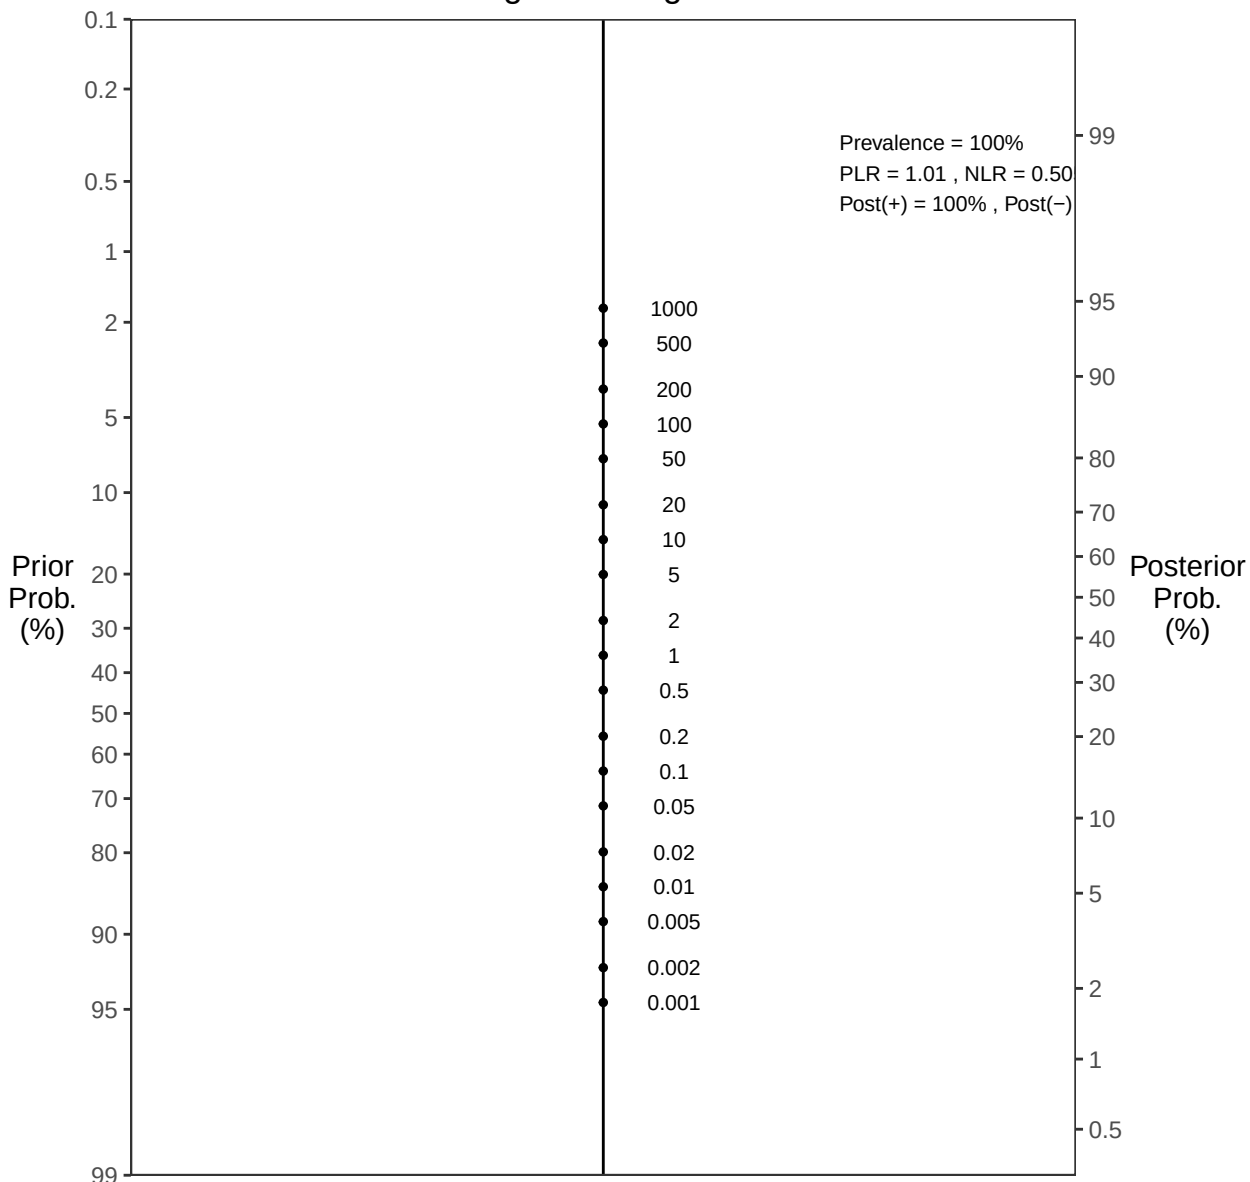

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

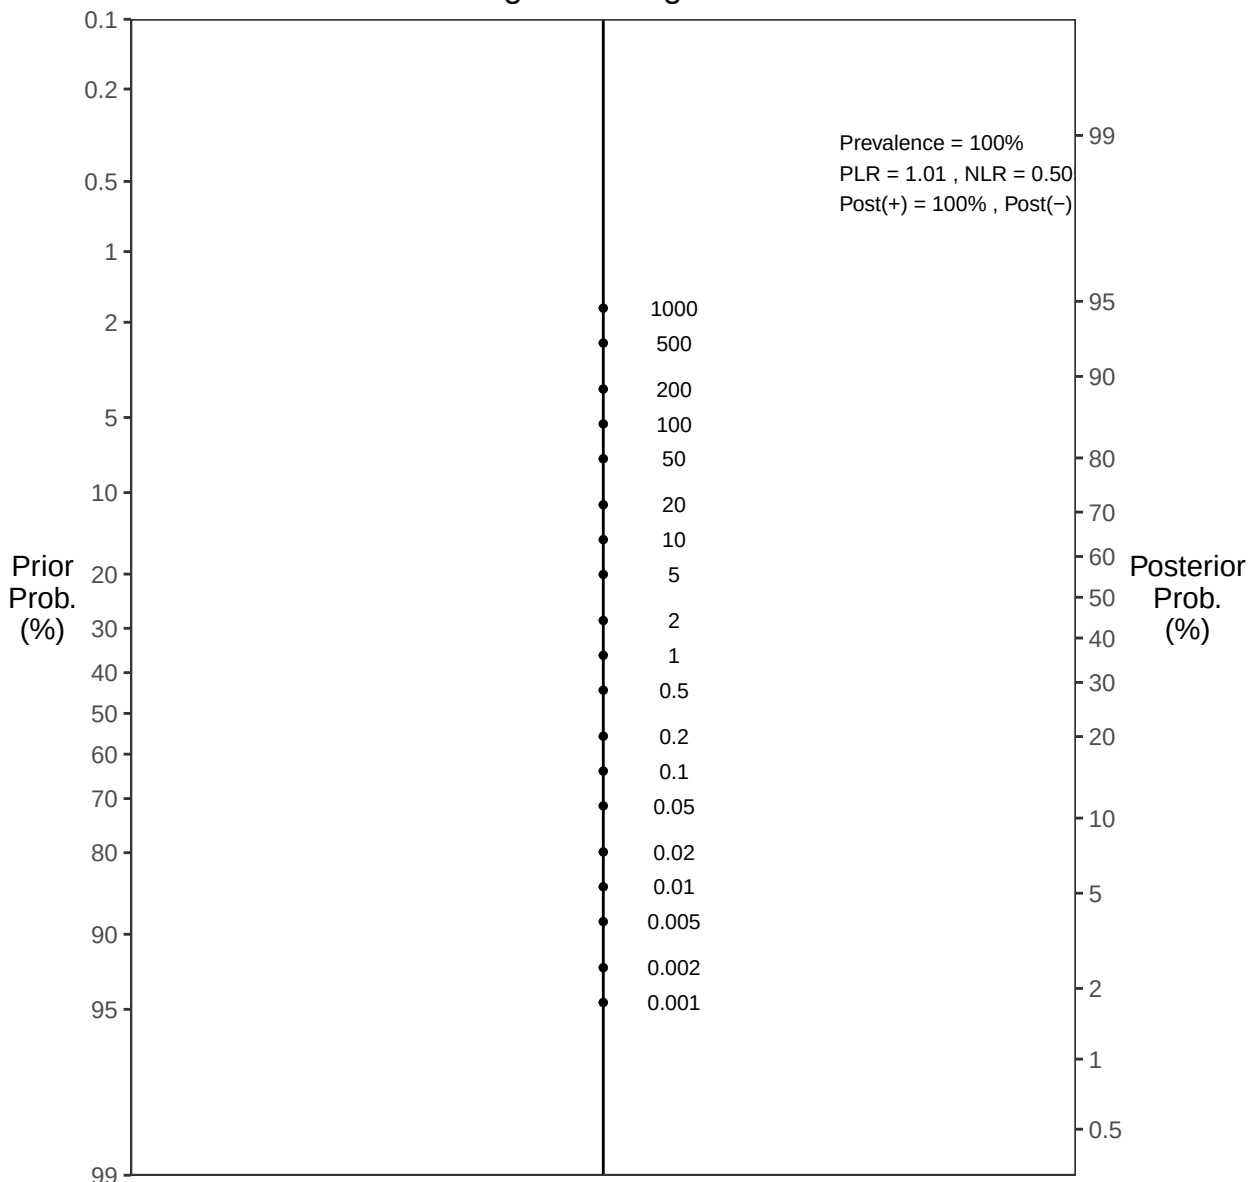

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

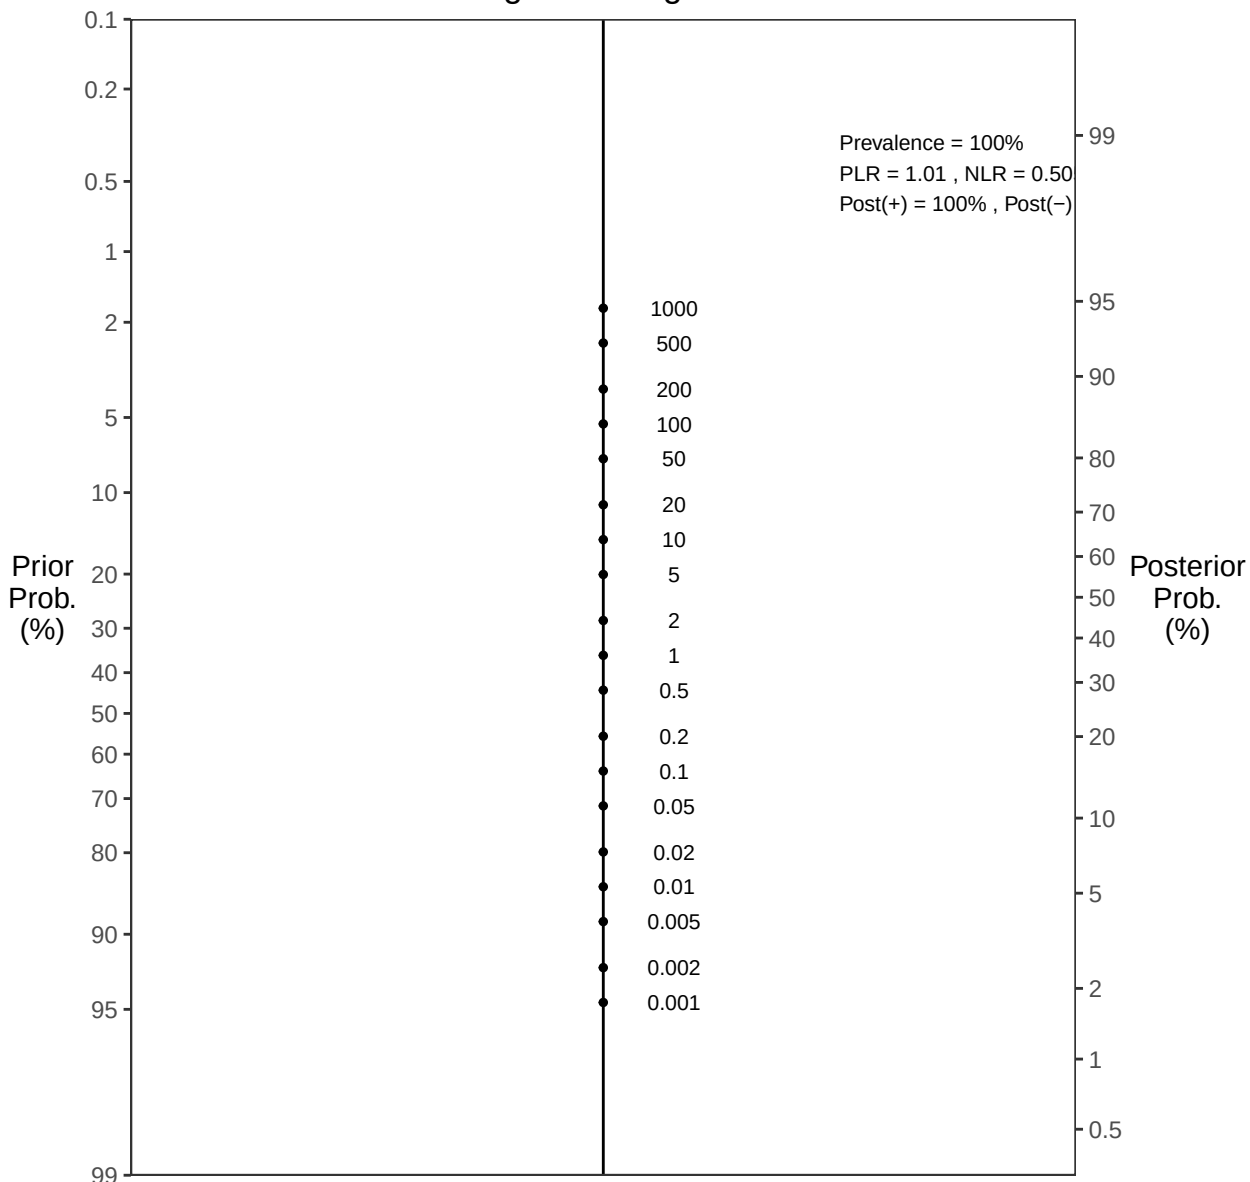

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

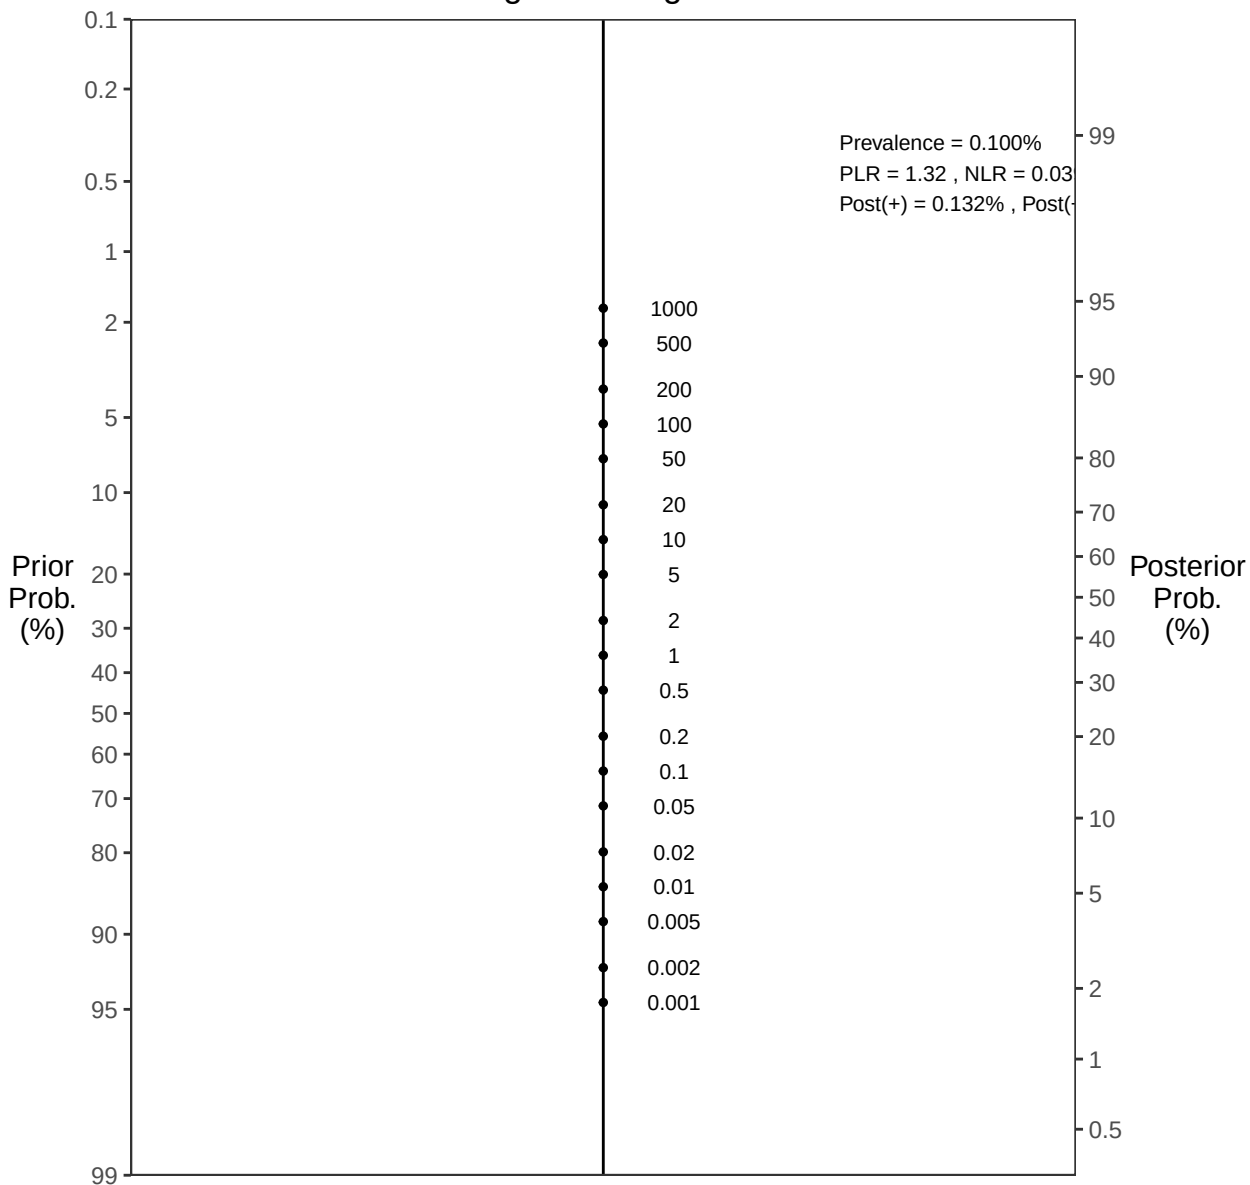

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

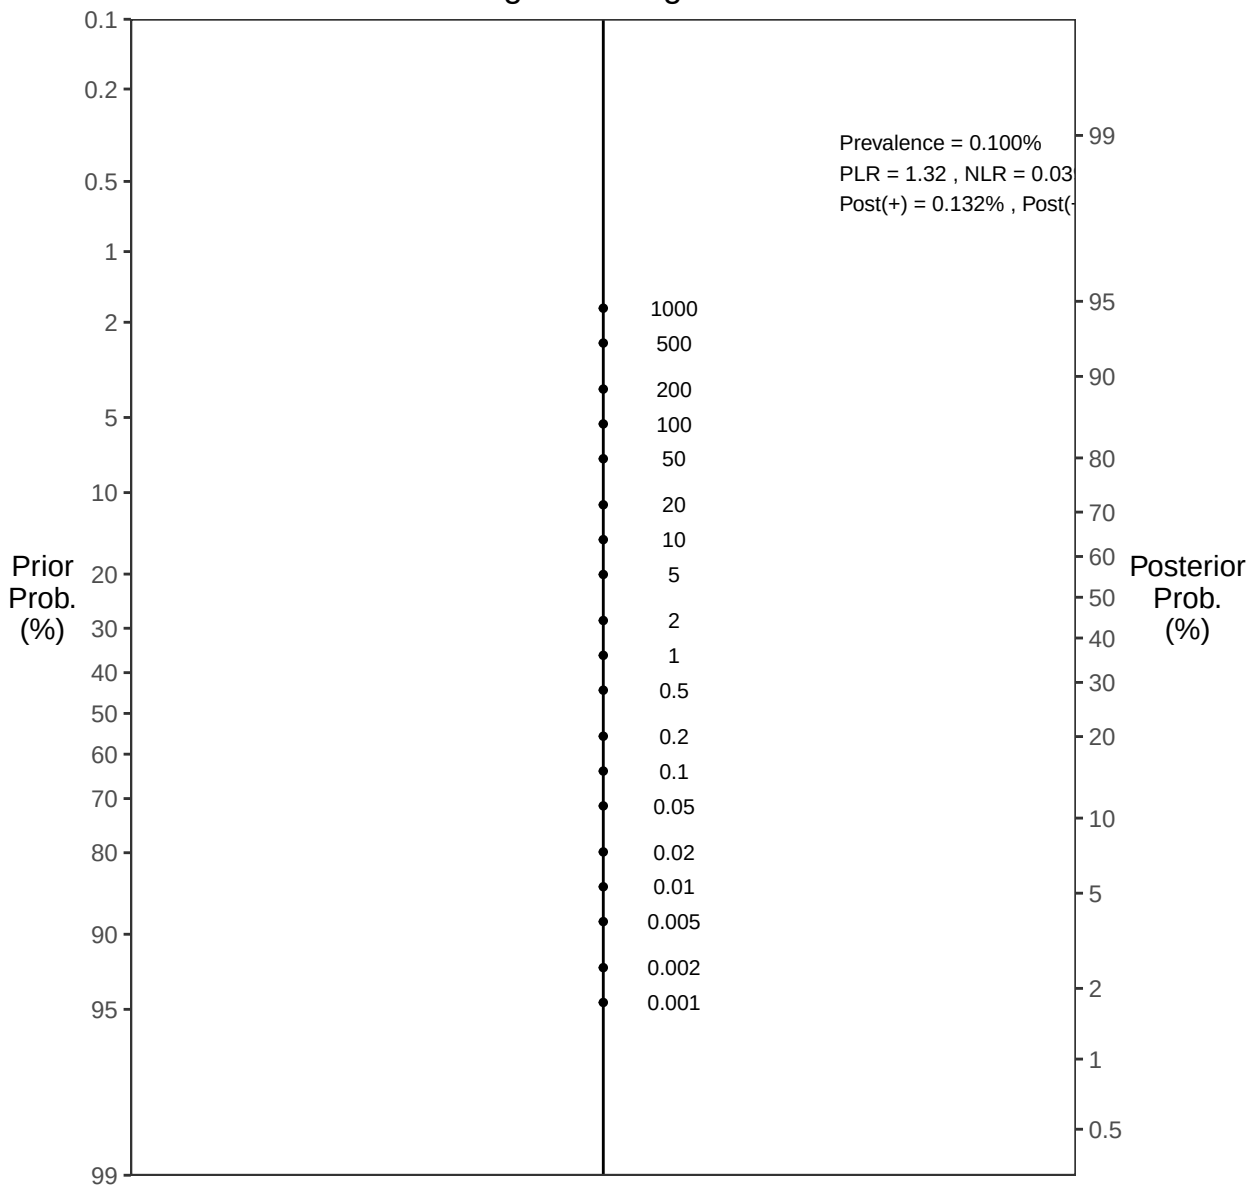

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

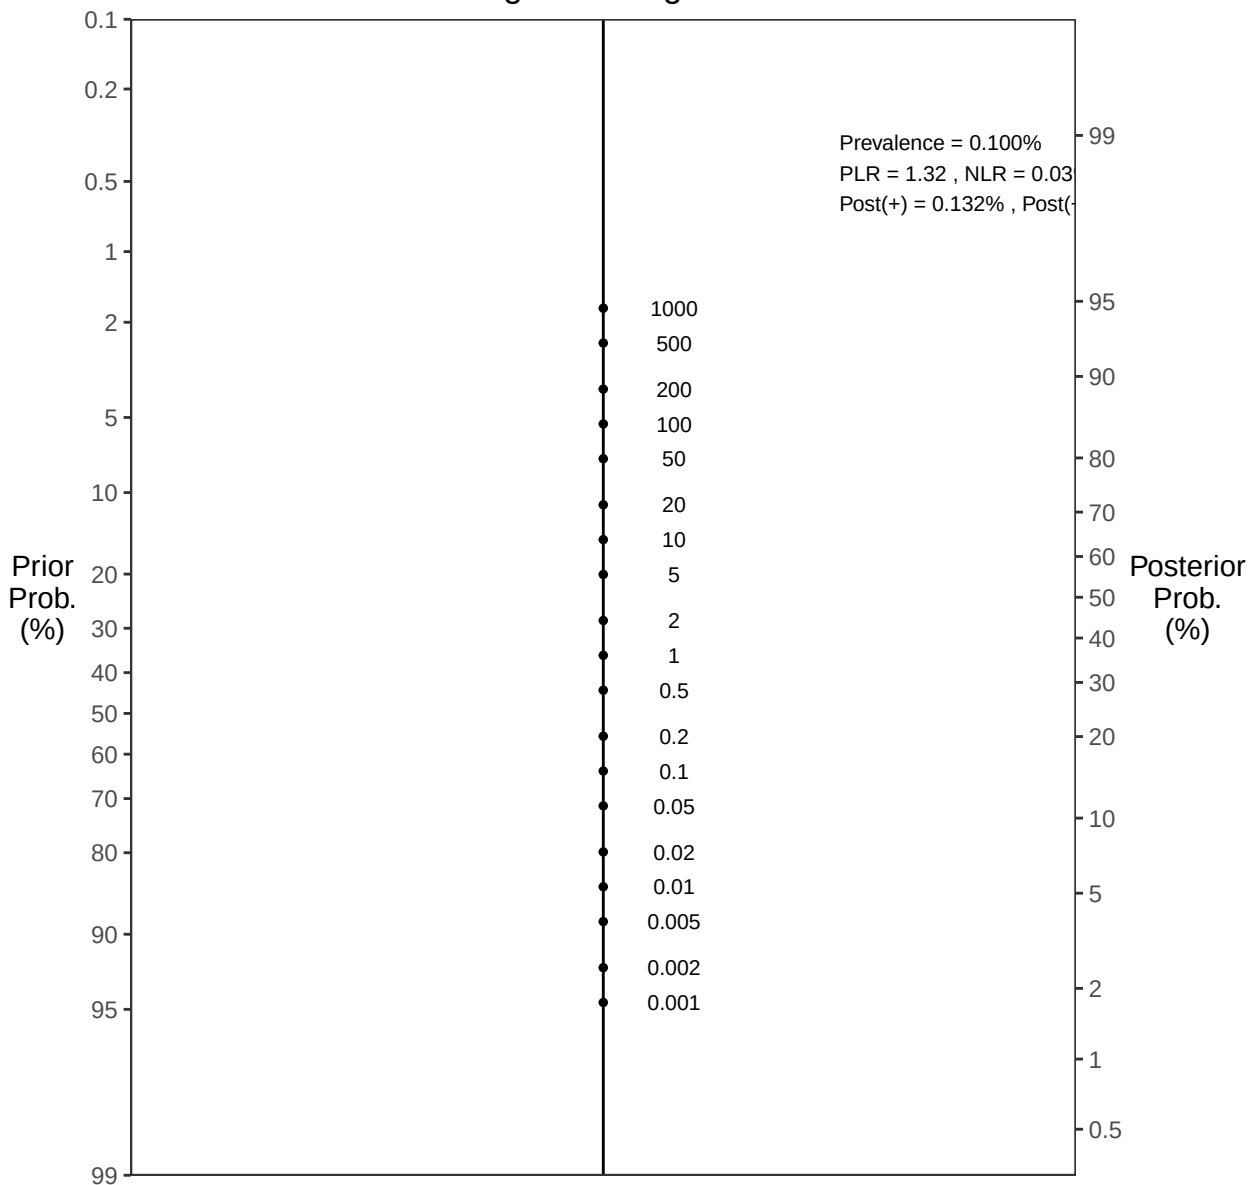

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

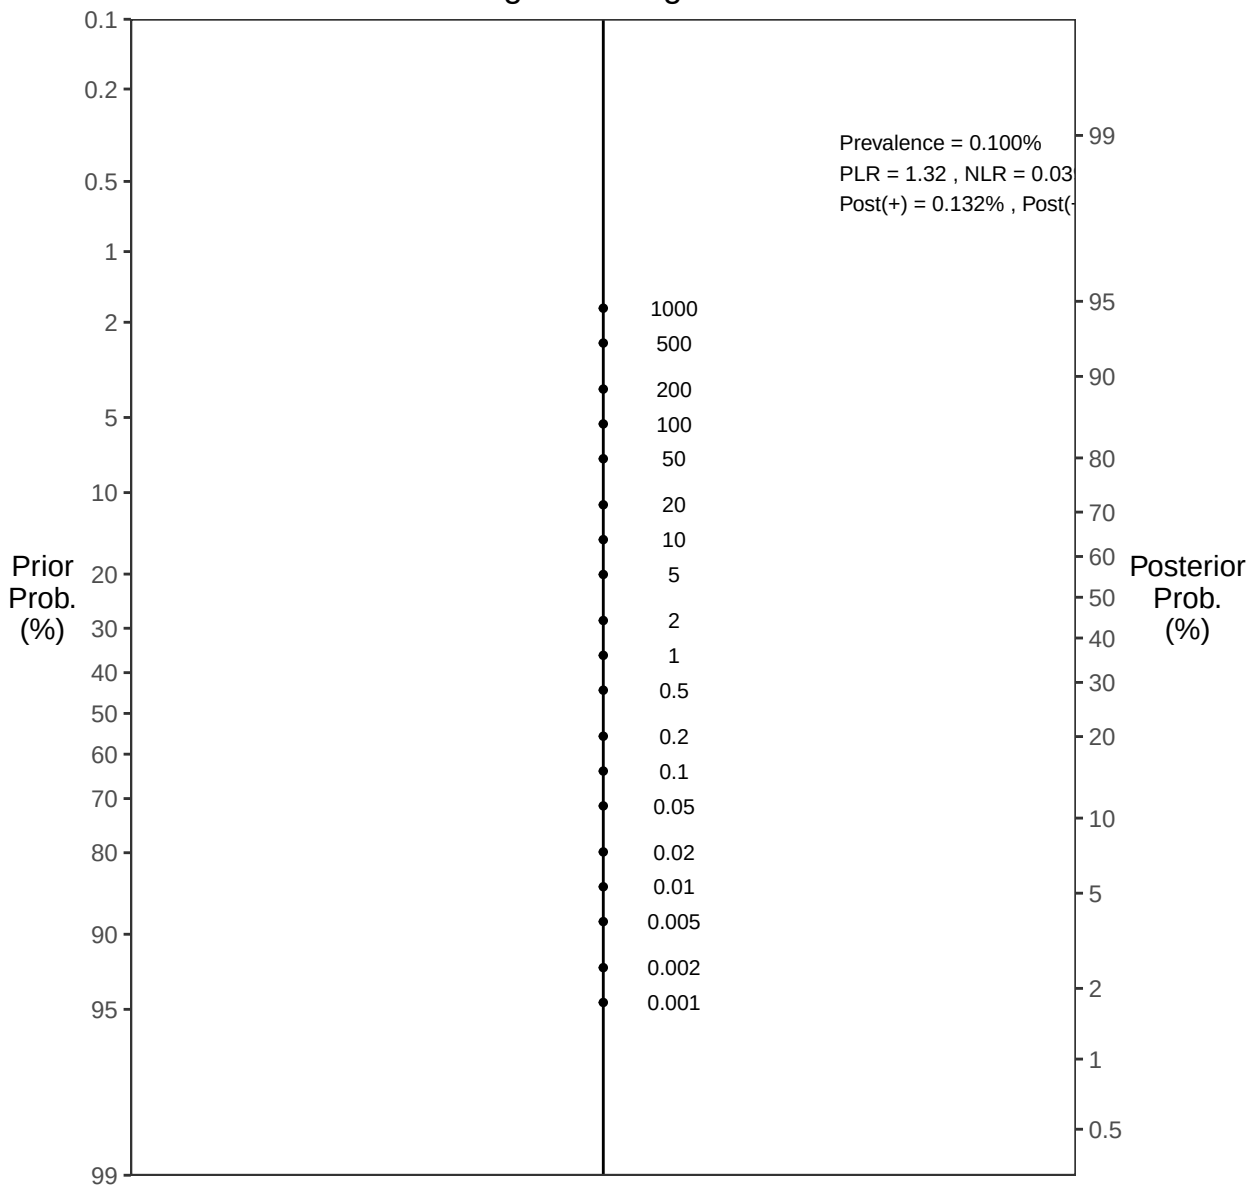

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

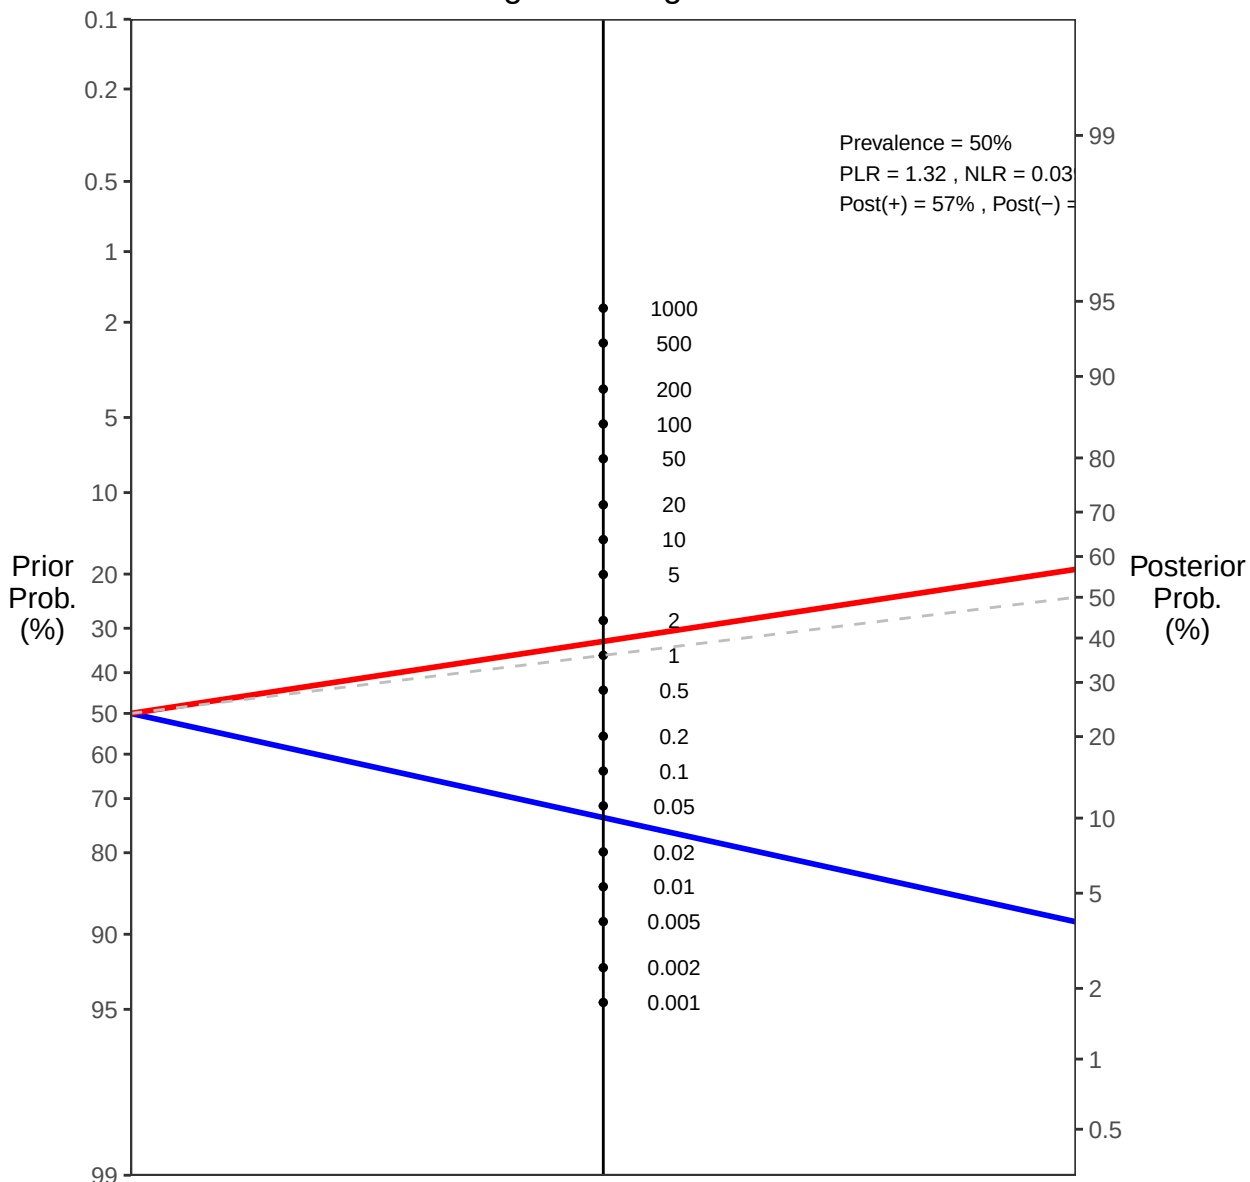

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

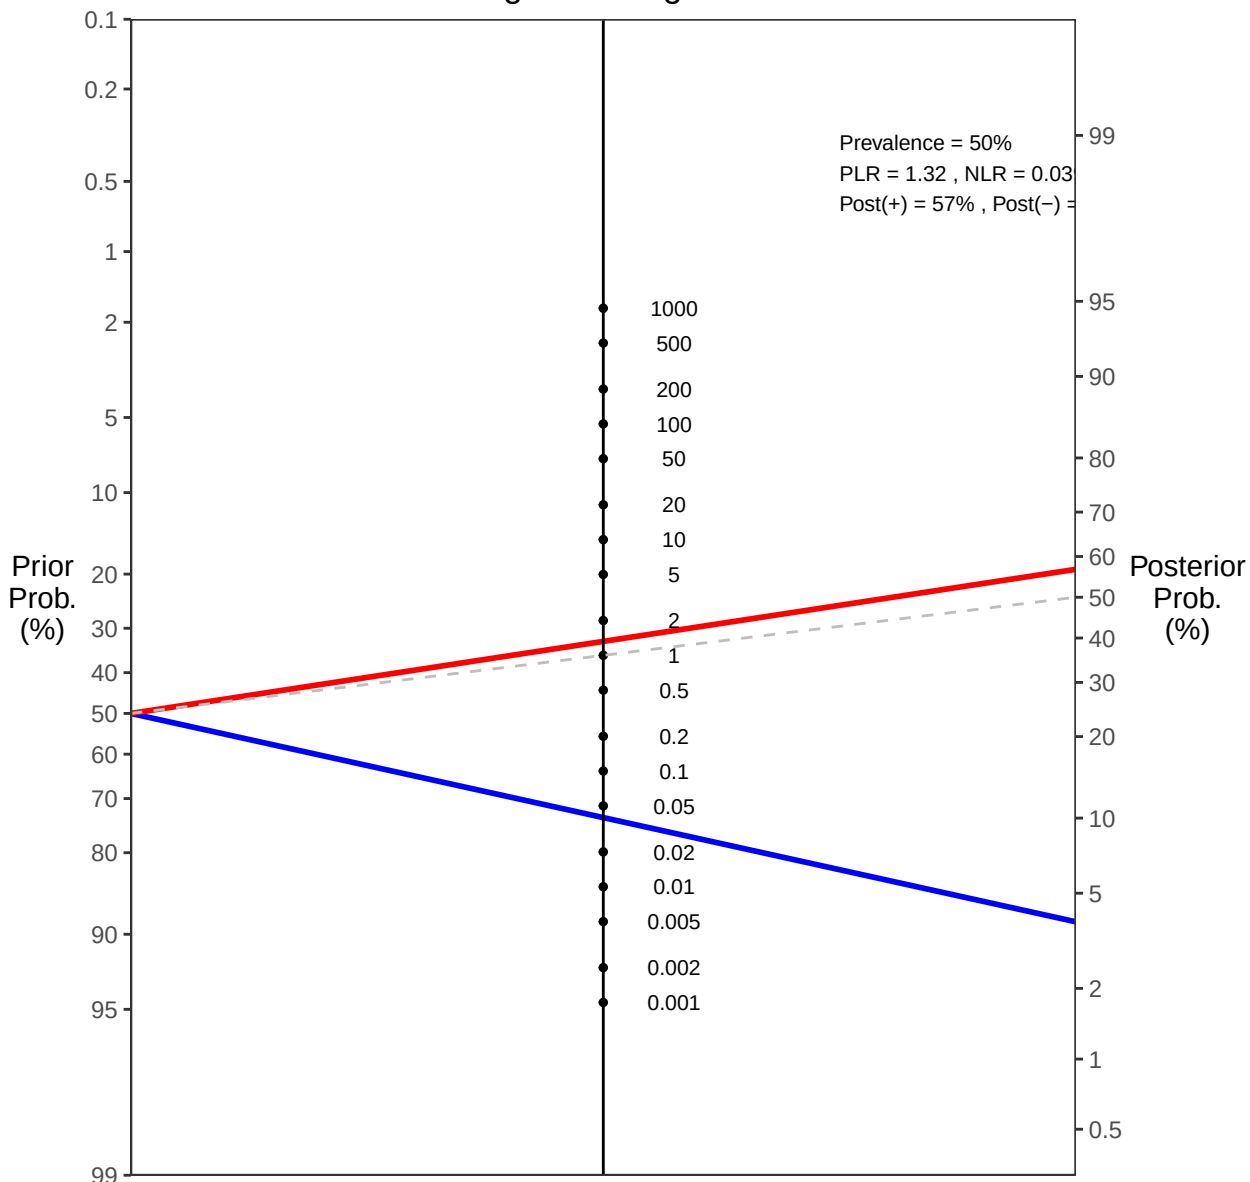

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

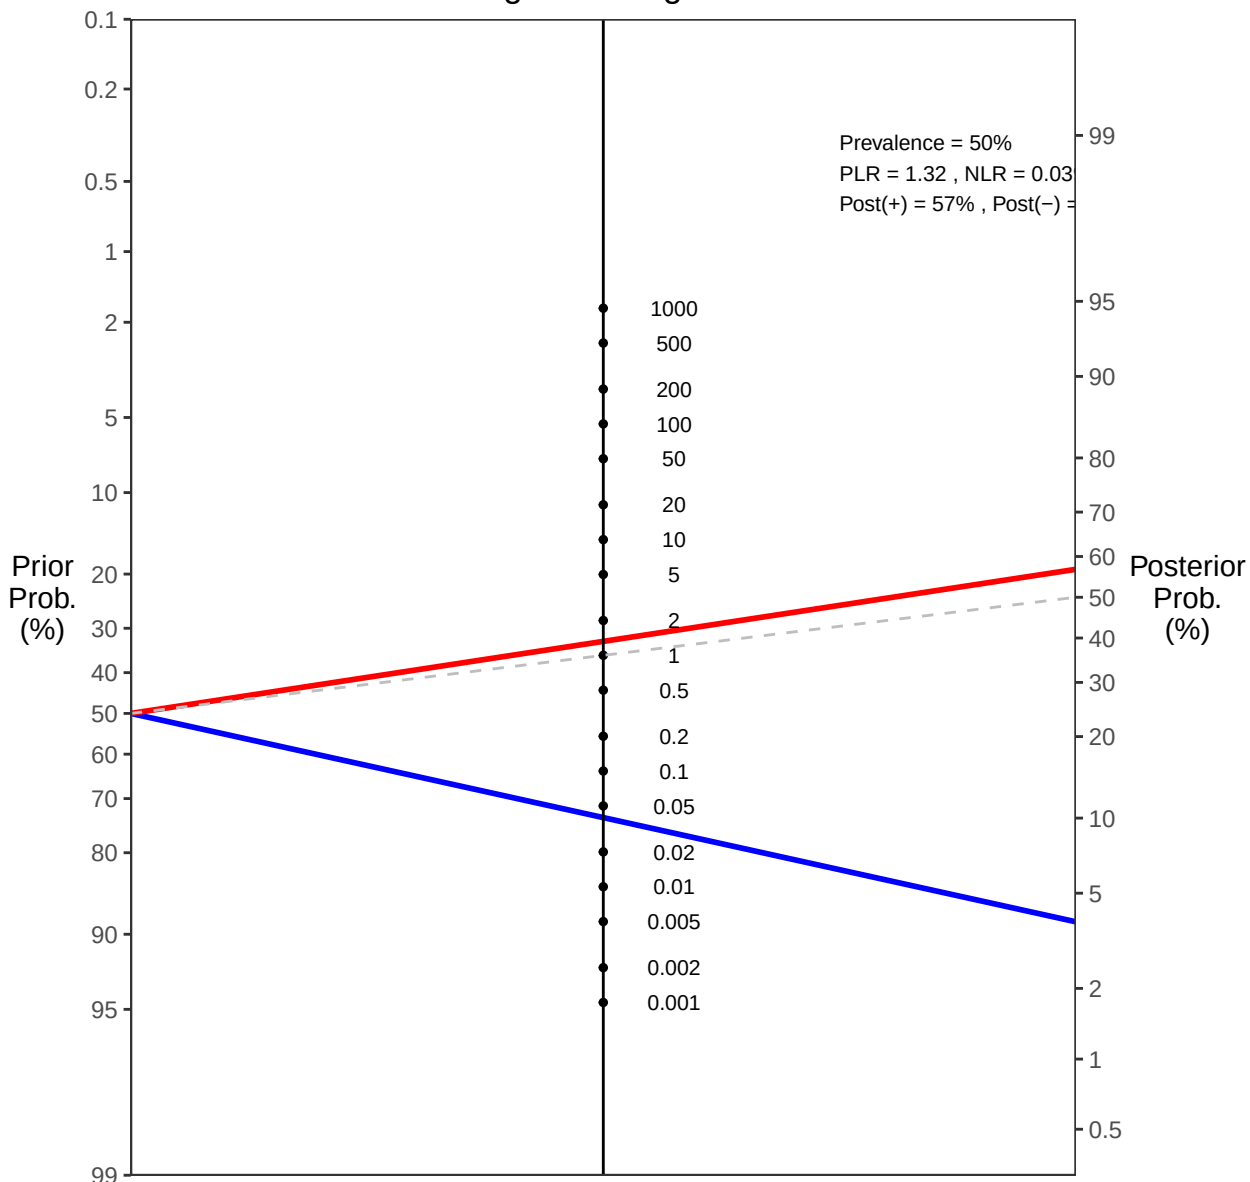

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

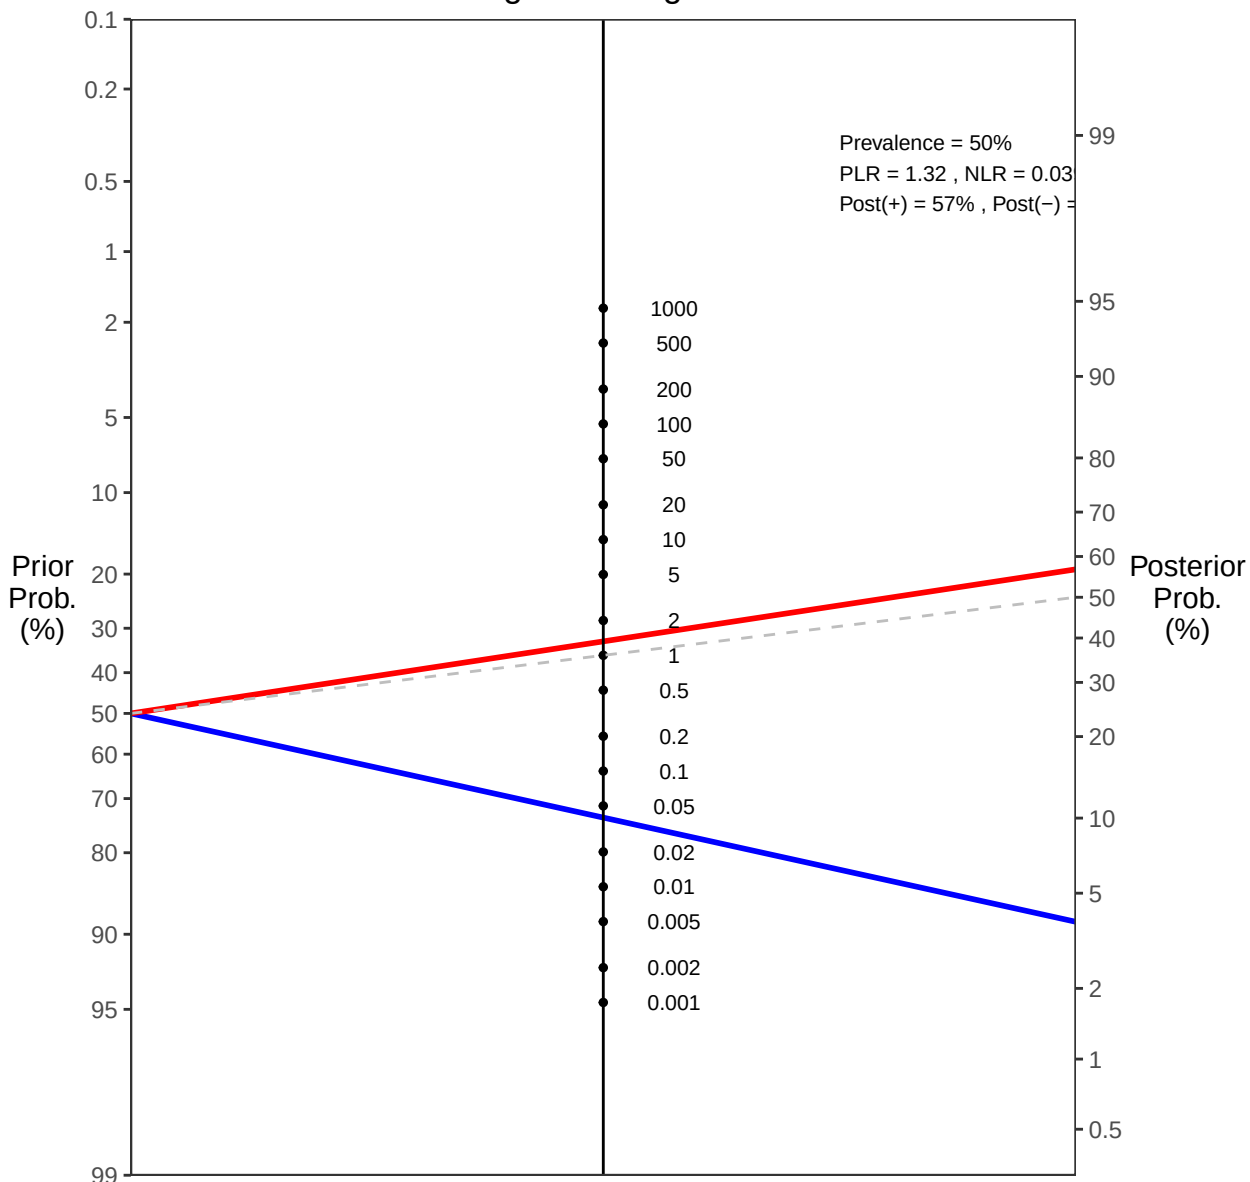

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

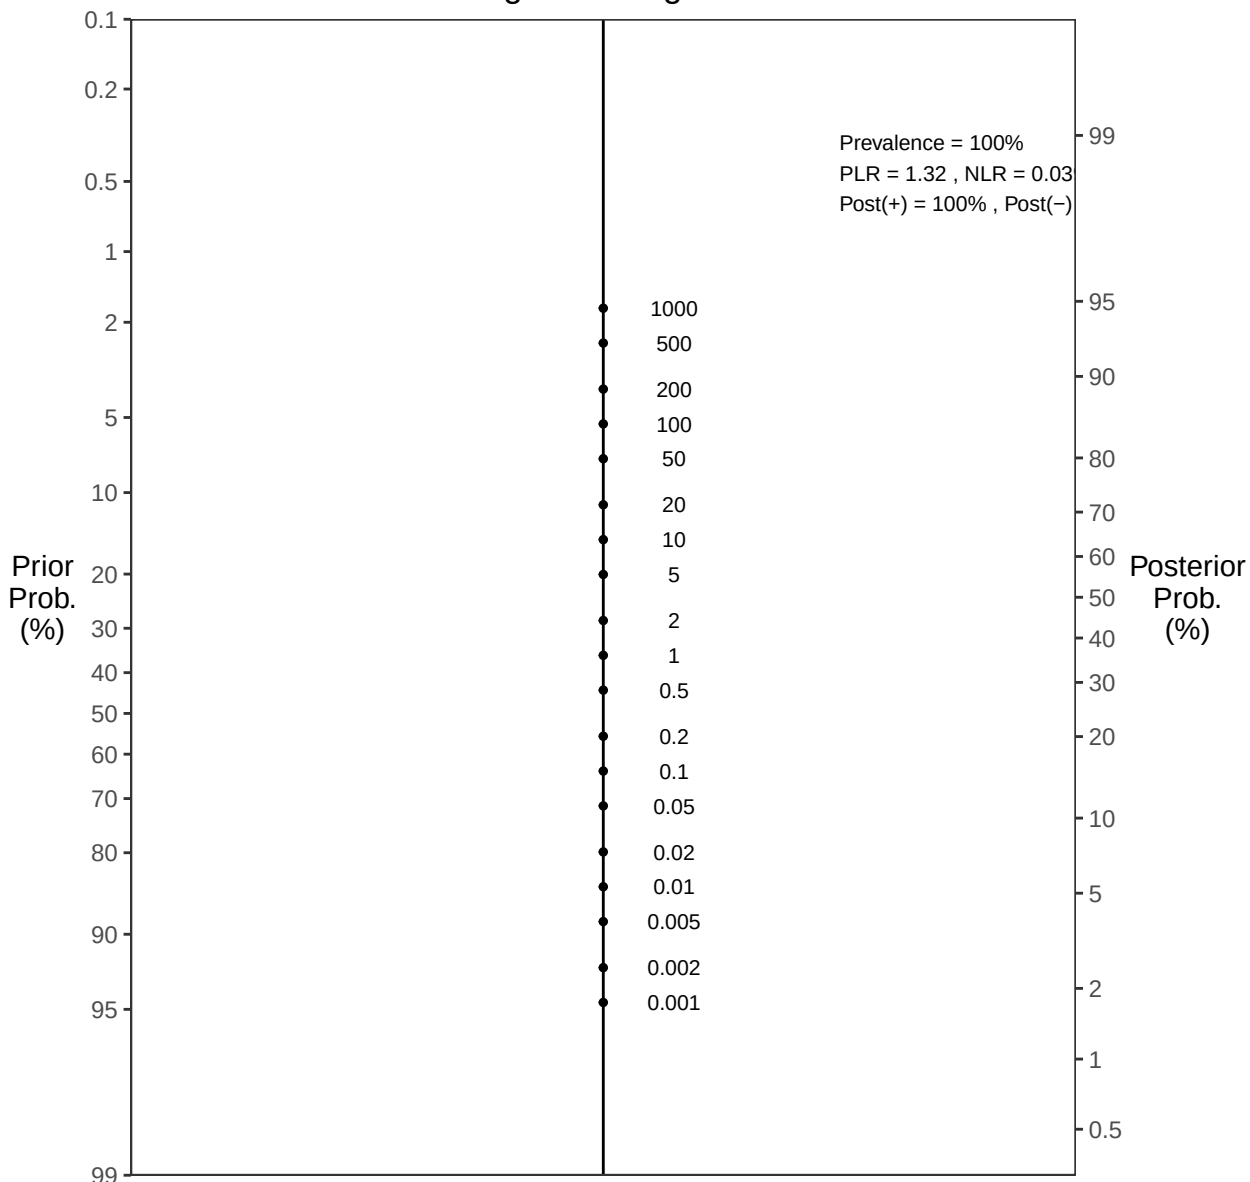

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

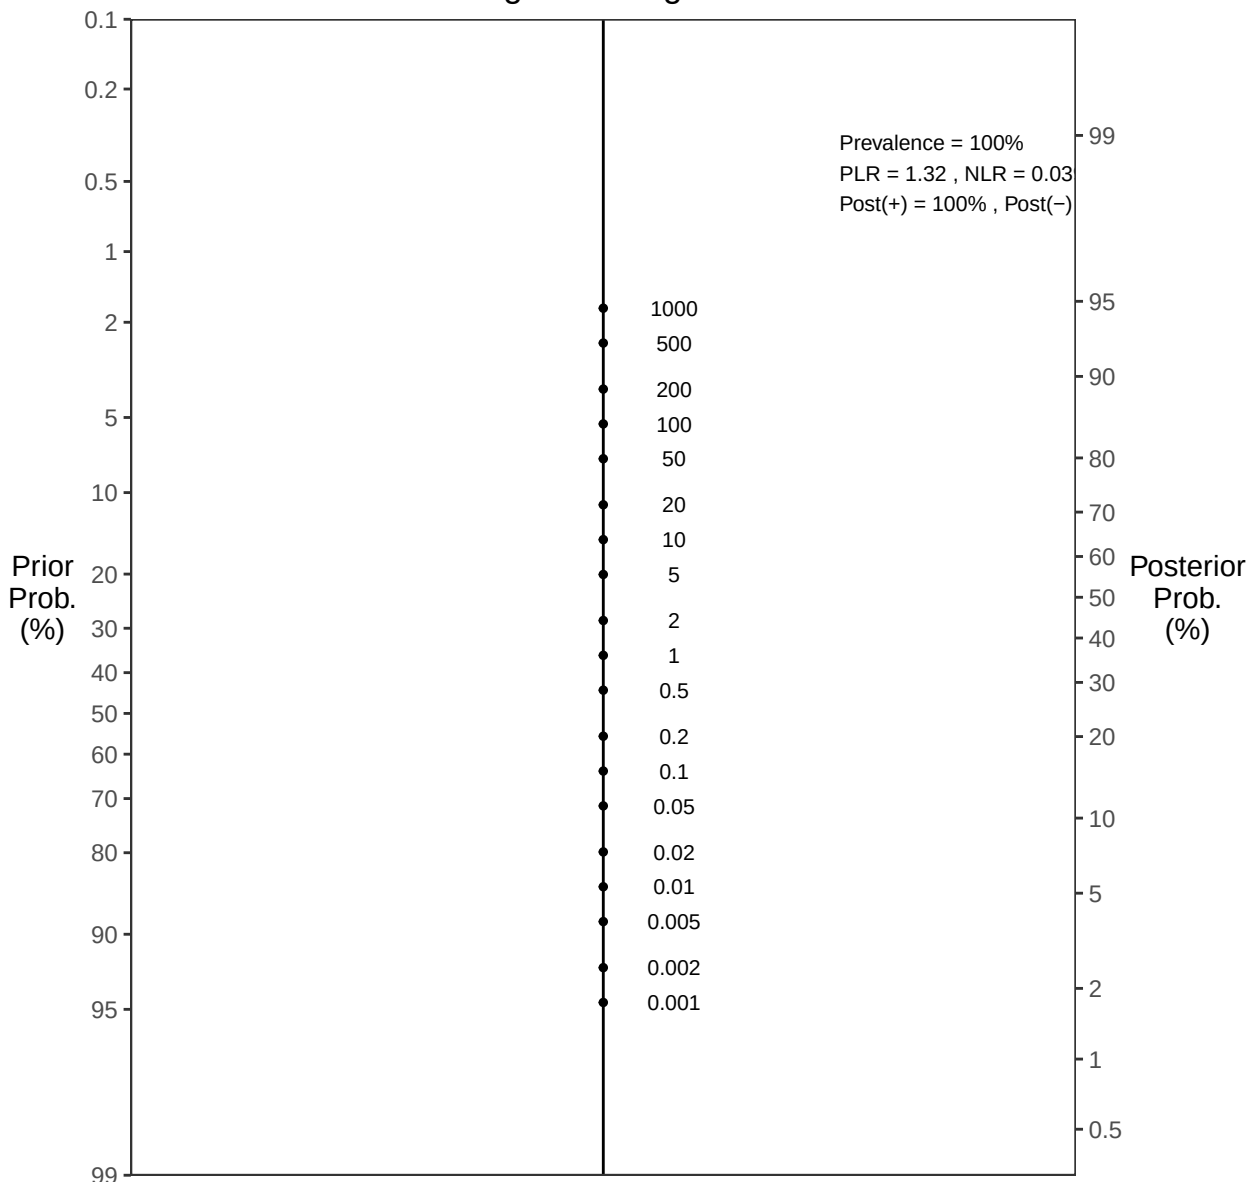

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

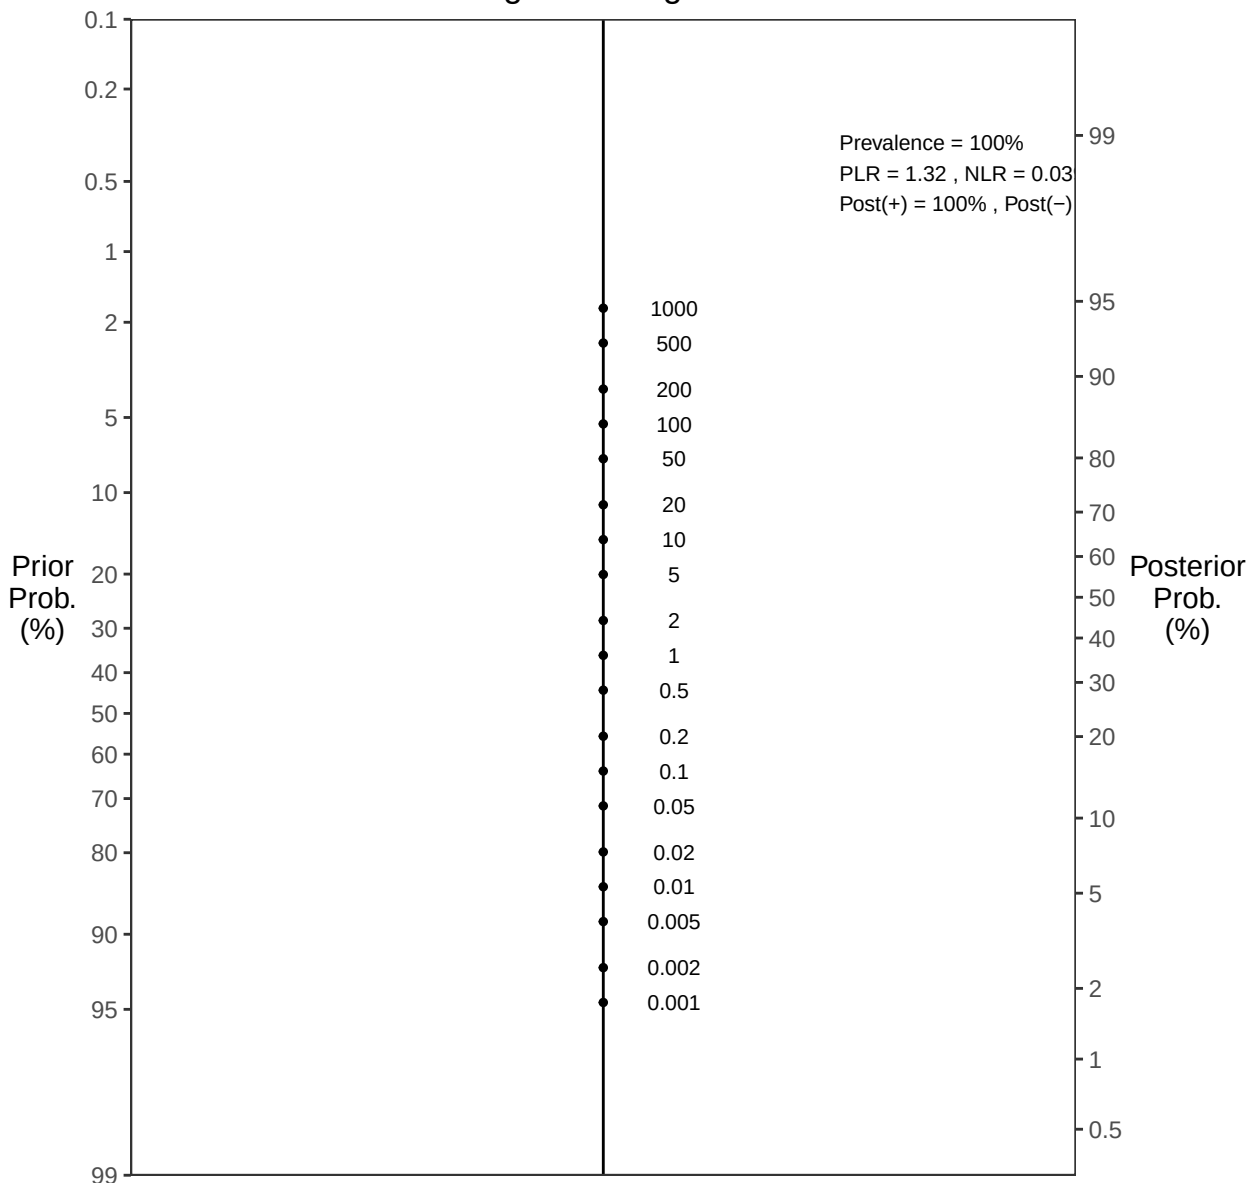

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

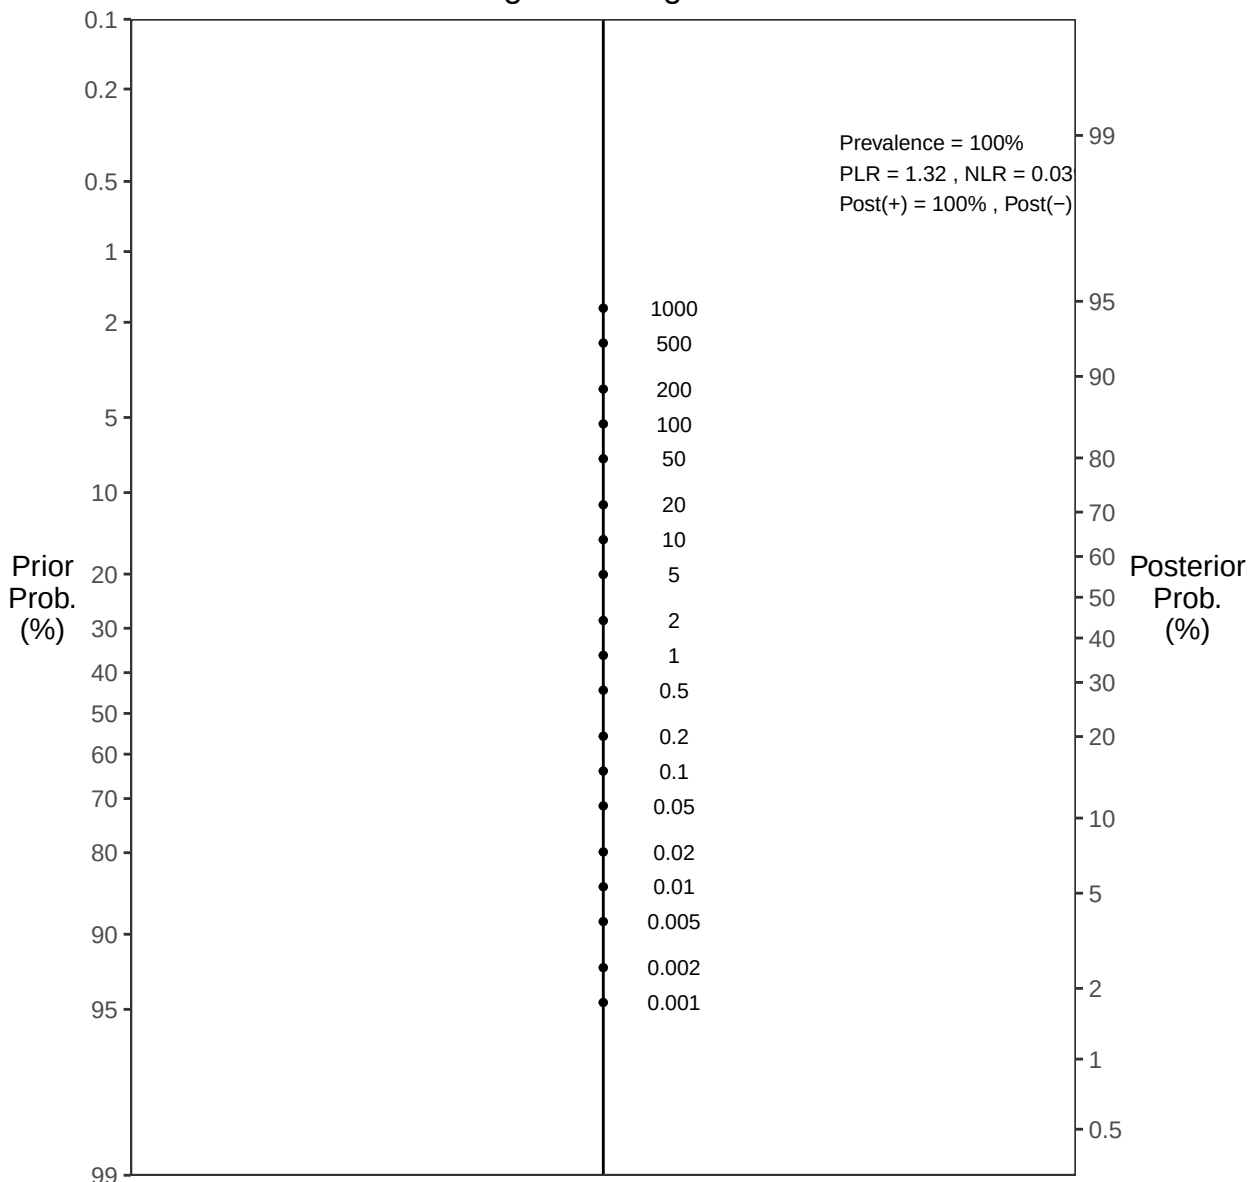

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

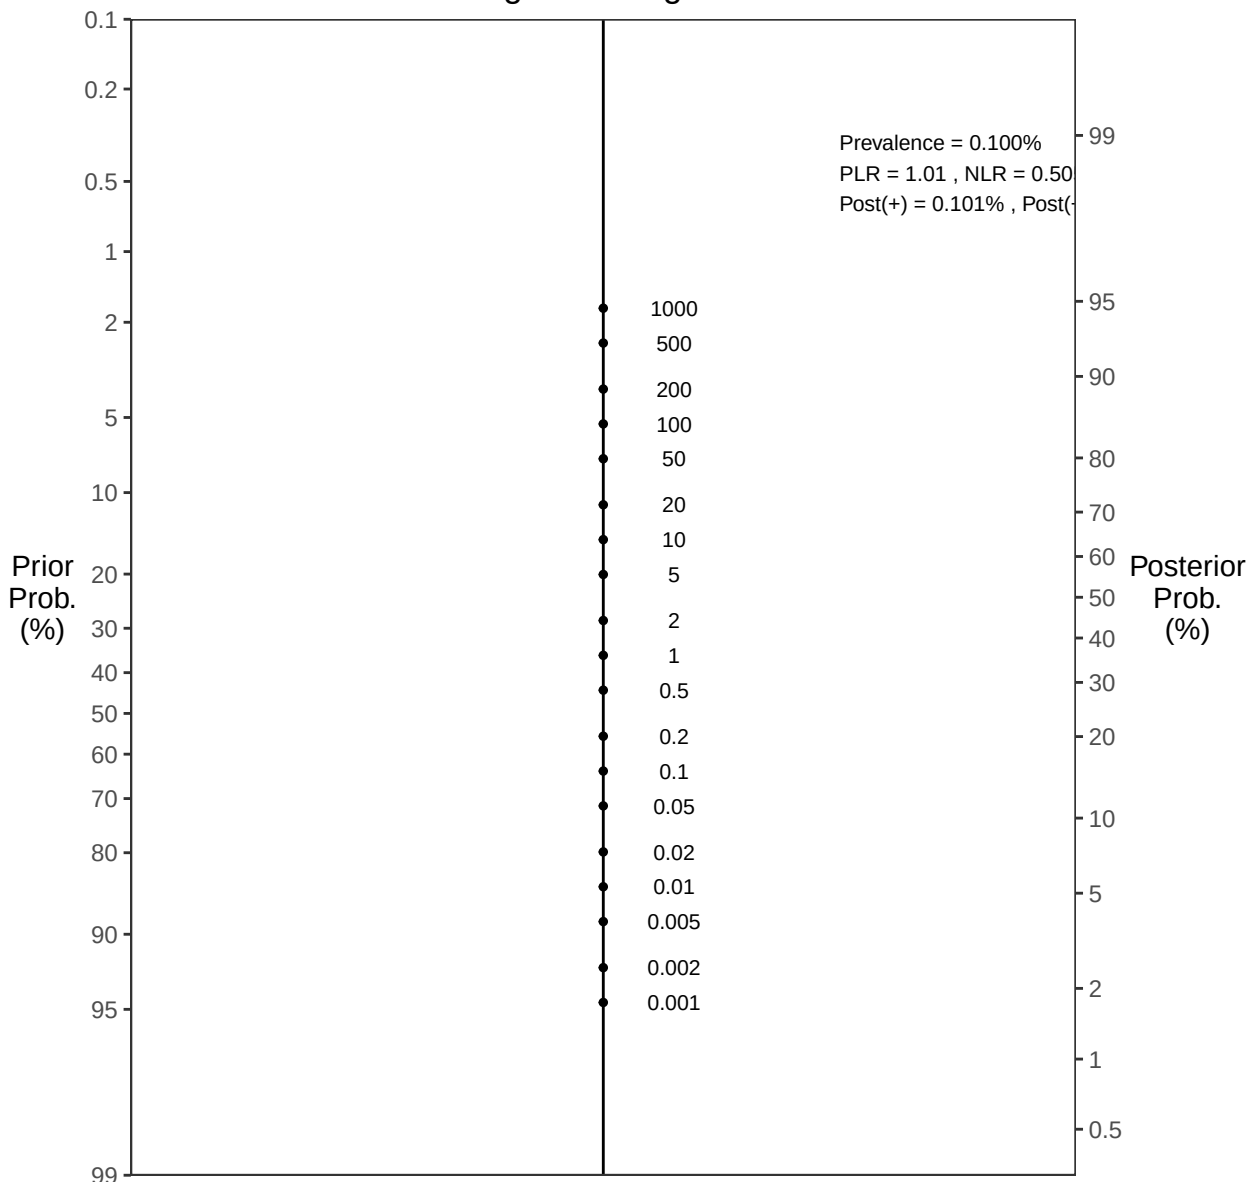

Parallel rule: positive if either test is positive, negative only if both are negative.

Fagan Nomogram

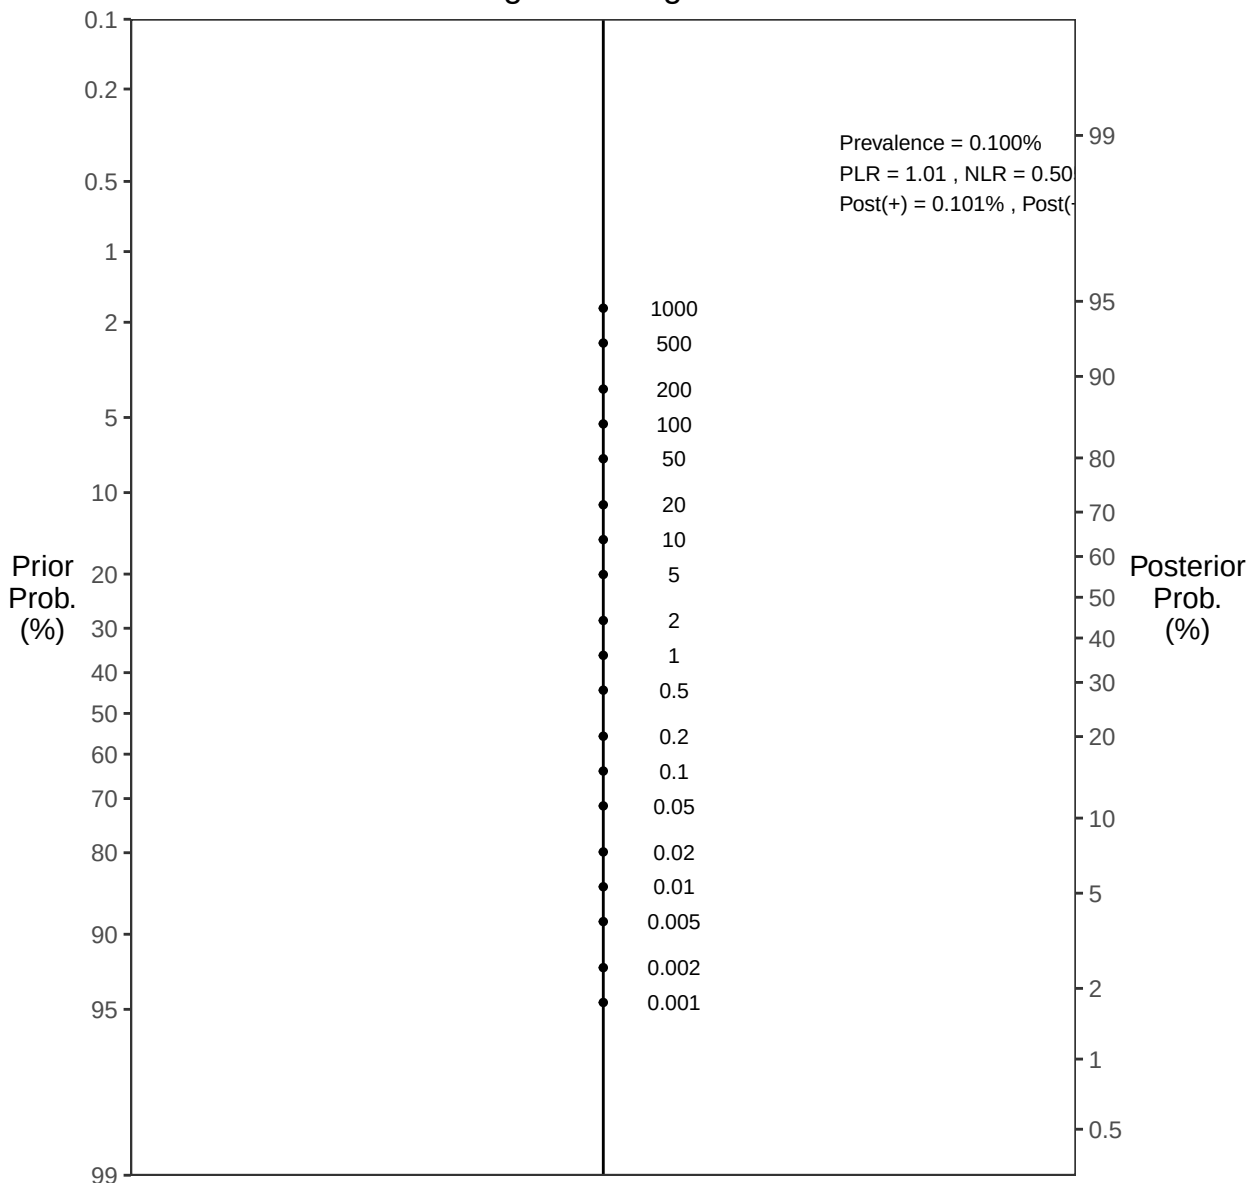

Parallel rule: positive if either test is positive, negative only if both are negative.
